

Kalinga Life Institute of Medical Sciences

(KLIMS)

Master Knowledge Base for Conversational AI / RAG Retrieval

Field	Detail
Founded	1987
Campus Address	KLIMS Health City, Plot 47, Chandaka Institutional Area, Patia, Bhubaneswar, Odisha 751024, India
Bed Strength	1450 beds (210 ICU beds)
Operation Theatres	32
Main Line	+91-674-660-1000
Emergency / Ambulance	+91-674-660-1111 1066 (toll-free) / +91-674-660-1066
Appointment Desk	+91-674-660-1234
Email	care@klimshospital.in
Website	www.klimshospital.in

Document type: synthetic reference dataset generated for retrieval-augmented generation (RAG) benchmarking of a hospital virtual-assistant use case. All names, schedules, prices and availability figures below are illustrative and dated to the generation run; they are not live hospital data.

How to Use This Document

This knowledge base is organised into self-contained sections designed for chunked ingestion into a vector database. Each department entry, FAQ, symptom mapping and diagnostic test is written as an independent unit so it can be embedded and retrieved on its own, while still carrying enough context (department name, block, floor) to be useful in isolation. Section 8 (Symptom → Specialty Mapping) is the semantic core for routing a user's free-text complaint to the correct department; Section 5 (Departments) and Section 6 (Doctors Directory) provide the entities that mapping resolves to.

1. Hospital Overview & History

Kalinga Life Institute of Medical Sciences (KLIMS) was established in 1987 and has grown into a 1450-bed multi-super-specialty tertiary care hospital in Bhubaneswar, Odisha. The campus spans ten interconnected blocks (A through J), housing 26 clinical departments, 32 operating theatres and 210 critical-care beds across general, cardiac, neuro, surgical and paediatric intensive care units.

KLIMS runs a 24x7 Emergency and Trauma department with a rooftop helipad for air-ambulance transfers, a Level III neonatal intensive care unit, a comprehensive cancer centre with linear accelerators and brachytherapy, and a dedicated organ transplant work-up programme spanning renal and bone-marrow transplantation. The hospital is NABH-accredited for hospital standards and NABL-accredited for its central laboratory.

The campus follows a hub-and-spoke layout: Block A (Kalinga Tower) is the main entry point for outpatient registration and diagnostic-hub specialties; Blocks B, C, D, E and I house the major inpatient and surgical specialties; Block F concentrates all laboratory and imaging services; Block G is the dedicated 24x7 emergency and trauma block; Block H groups the high-volume outpatient specialties (dermatology, eye, ENT, dental, rheumatology); and Block J holds patient amenities, pharmacy, guest house and administrative support services.

Governance and quality: KLIMS operates under a Medical Superintendent-led clinical governance structure with department-wise Heads of Department, a hospital infection control committee, a pharmacy and therapeutics committee, and a patient safety and quality council that reviews incident reports monthly. A weekly multidisciplinary tumour board coordinates cancer care across medical, surgical and radiation oncology, and a similar cardiac and stroke code process coordinates time-critical emergencies between the Emergency Department, Cardiology, Neurology and Radiology.

2. Campus Infrastructure

The KLIMS campus is organised into ten blocks, each a multi-storey tower connected to its neighbours by covered skywalks at the second-floor level and by the ground-floor patient corridor. The table below summarises each block; detailed department-to-floor mapping follows in Section 5.

Block	Name	Floors	Primary Function
A	Kalinga Tower (Main OPD & Administration)	8	Central registration, cardiac sciences and internal medicine hub with the executive administration wing on the top floors.
B	Surgical Sciences Block	7	Houses all major operating theatres, surgical specialties and the central sterile supply department.
C	Mother & Child Block	6	Dedicated maternity, neonatology and paediatrics tower with a child-friendly interior scheme.
D	Neurosciences & Rehabilitation Block	6	Neurology, psychiatry and physical medicine with a rooftop rehabilitation garden.
E	Kalinga Cancer Centre	7	Comprehensive oncology and haematology centre with bunkered radiotherapy suites in the basement.
F	Diagnostics & Imaging Block	5	All laboratory medicine and radiology services under one roof with a 24x7 sample collection lounge.
G	Emergency & Trauma Block	4	24x7 emergency department, trauma bays, observation wards and a rooftop helipad.
H	Specialty OPD Block	5	High-volume outpatient specialties: dermatology, ophthalmology, ENT, dental and rheumatology.
I	Medical Specialties Block	6	Gastroenterology, pulmonology, nephrology and endocrinology with dedicated day-care dialysis and endoscopy units.
J	Patient Services & Amenities Block	4	Cafeterias, 24x7 pharmacy, guest house, auditorium, bank, and patient support offices.

Wayfinding: every block has a colour-coded main gate, a ground-floor 'May I Help You' desk, and lift lobbies with Braille and tactile signage. Emergency signage (Block G) is red-coded and visible from every campus gate. A free electric shuttle loops all ten blocks every 10 minutes between 7 AM and 9 PM; wheelchairs and stretcher trolleys are available at every block entrance without deposit.

Parking and arrival: the main multi-level car park (1,200 cars) sits behind Block J, with two-wheeler parking beside Block G and valet service at the Block A main porch. Covered patient drop-off bays are located at Blocks A, C, E and G. An hourly shuttle connects the campus to Bhubaneswar Railway Station (9 km) and an airport assistance desk arranges pick-up and drop for outstation and international patients travelling via Biju Patnaik International Airport (12 km).

3. Clinical Departments

KLIMS operates 26 clinical departments. Each entry below lists the department's scope, block/floor location, sub-specialty clinics, key equipment, procedures offered, and whether the department accepts emergency walk-ins around the clock.

Cardiology

Location: Block A, Floor 3 **Emergency availability:** Yes — 24x7 emergency cover

Diagnosis and treatment of diseases of the heart and blood vessels, from hypertension to complex interventional procedures.

Sub-specialty clinics: Interventional Cardiology; Electrophysiology; Heart Failure Clinic; Preventive Cardiology; Paediatric Cardiology

Key equipment: 3 Cardiac Catheterization Labs (Philips Azurion); 128-slice Cardiac CT; 3D Echocardiography units; Treadmill Test (TMT) suite; Holter & event monitoring lab; IABP and ECMO support

Procedures offered: Coronary angiography; Angioplasty with stenting (PCI); Pacemaker implantation; ICD/CRT device implantation; Electrophysiology study and ablation; Balloon valvotomy; TAVI (transcatheter aortic valve implantation)

Neurology

Location: Block D, Floor 2 **Emergency availability:** Yes — 24x7 emergency cover

Care of disorders of the brain, spinal cord, nerves and muscles, including a 24x7 acute stroke pathway.

Sub-specialty clinics: Stroke Medicine; Epilepsy Clinic; Movement Disorders; Neuromuscular Clinic; Headache Clinic

Key equipment: 64-channel video EEG lab; EMG/NCS laboratory; Transcranial Doppler; Dedicated stroke unit with 12 beds; Botulinum toxin injection suite

Procedures offered: Thrombolysis for acute stroke; Mechanical thrombectomy (with Interventional Radiology); Video EEG monitoring; Nerve conduction studies; Botulinum toxin therapy for dystonia and migraine; Lumbar puncture and CSF studies

Orthopedics

Location: Block B, Floor 3 **Emergency availability:** Yes — 24x7 emergency cover

Surgical and non-surgical care of bones, joints, ligaments and the spine, including joint replacement and sports injuries.

Sub-specialty clinics: Joint Replacement; Spine Surgery; Sports Medicine & Arthroscopy; Paediatric Orthopedics; Trauma Surgery

Key equipment: Modular operating theatres with laminar airflow; Computer-navigated joint replacement system; 4K arthroscopy towers; C-arm image intensifiers; DEXA bone density scanner (with Radiology)

Procedures offered: Total knee and hip replacement; Arthroscopic ACL reconstruction; Spinal decompression and fusion; Fracture fixation (plating, nailing); Deformity correction; Intra-articular injections

Gastroenterology

Location: Block I, Floor 2 **Emergency availability:** Yes — 24x7 emergency cover

Medical care of the digestive tract, liver and pancreas with a comprehensive therapeutic endoscopy unit.

Sub-specialty clinics: Hepatology; Therapeutic Endoscopy; Inflammatory Bowel Disease Clinic; Pancreatology

Key equipment: High-definition endoscopy suites (6 rooms); Endoscopic ultrasound (EUS); ERCP suite with fluoroscopy; FibroScan (liver elastography); Capsule endoscopy system; 24-hour pH-impedance and manometry lab

Procedures offered: Upper GI endoscopy (gastroscopy); Colonoscopy with polypectomy; ERCP for bile duct stones; Variceal band ligation; EUS-guided biopsy; Liver biopsy; Oesophageal and colonic stenting

Pulmonology

Location: Block I, Floor 3 **Emergency availability:** Yes — 24x7 emergency cover

Respiratory medicine covering asthma, COPD, sleep-disordered breathing, tuberculosis and interventional bronchoscopy.

Sub-specialty clinics: Interventional Pulmonology; Sleep Medicine; Asthma & Allergy Clinic; TB & Chest Clinic

Key equipment: Complete pulmonary function lab with DLCO; Video bronchoscopy suite with EBUS; Level-1 sleep lab (4 beds); Non-invasive ventilation fleet; Thoracoscopy unit

Procedures offered: Spirometry and full PFT; Bronchoscopy with lavage and biopsy; EBUS-guided nodal biopsy; Medical thoracoscopy; Polysomnography (sleep study); CPAP/BiPAP titration; Pleural drainage and pleurodesis

Nephrology

Location: Block I, Floor 4 **Emergency availability:** Yes — 24x7 emergency cover

Kidney care from early chronic kidney disease to dialysis and transplant work-up.

Sub-specialty clinics: Haemodialysis Unit; Peritoneal Dialysis Programme; Transplant Nephrology; Glomerular Disease Clinic

Key equipment: 42-station haemodialysis unit with online HDF; CRRT machines for ICU dialysis; Kidney biopsy suite with ultrasound guidance; Water treatment plant (AAMI standard)

Procedures offered: Maintenance haemodialysis; CAPD catheter insertion and training; Kidney biopsy; Plasmapheresis; AV fistula assessment; Renal transplant evaluation

Urology

Location: Block B, Floor 4 **Emergency availability:** Yes — 24x7 emergency cover

Surgical care of the kidneys, bladder, prostate and male reproductive system, with a full endourology suite.

Sub-specialty clinics: Endourology & Stone Clinic; Uro-oncology; Andrology; Female Urology; Paediatric Urology

Key equipment: Holmium laser lithotripsy; Extracorporeal shockwave lithotripsy (ESWL); Flexible ureteroscopes; Urodynamics laboratory; 3D laparoscopy tower

Procedures offered: URS and PCNL for stones; ESWL; TURP for prostate enlargement; Laparoscopic nephrectomy; Cystoscopy; Circumcision and hydrocele repair; Urodynamic study

Oncology

Location: Block E, Floor 2 **Emergency availability:** Yes — 24x7 emergency cover

Comprehensive cancer care across medical, surgical and radiation oncology, coordinated through a weekly tumour board.

Sub-specialty clinics: Medical Oncology; Radiation Oncology; Surgical Oncology; Palliative Care; Onco-counselling

Key equipment: Two linear accelerators (IMRT/IGRT/SBRT capable); Brachytherapy suite; 22-chair day-care chemotherapy unit; PET-CT (with Radiology); Chemo compounding pharmacy with isolators

Procedures offered: Chemotherapy and immunotherapy; Targeted therapy planning; IMRT/IGRT radiotherapy; Brachytherapy; Tumour board review; Port insertion for chemotherapy; Palliative pain procedures

Endocrinology

Location: Block I, Floor 5 **Emergency availability:** No — scheduled OPD only, refer to Emergency Medicine (Block G) for urgent cases

Hormone and metabolic disorders including diabetes, thyroid, obesity, and bone metabolic disease.

Sub-specialty clinics: Diabetes Clinic; Thyroid Clinic; Obesity & Metabolic Clinic; Pituitary & Adrenal Clinic; PCOS Clinic (with ObGyn)

Key equipment: Continuous glucose monitoring programme; Insulin pump initiation unit; Diabetic foot lab with biothesiometer; DEXA access for bone density; Dedicated diabetes educators

Procedures offered: Structured diabetes education; Insulin pump and CGM initiation; Thyroid nodule FNAC coordination; Dynamic endocrine testing (dexamethasone, water deprivation); Diabetic foot risk assessment

Dermatology

Location: Block H, Floor 1 **Emergency availability:** No — scheduled OPD only, refer to Emergency Medicine (Block G) for urgent cases

Skin, hair and nail disorders with dedicated dermatosurgery, laser and aesthetic units.

Sub-specialty clinics: Dermatosurgery; Laser & Aesthetics; Paediatric Dermatology; Trichology (Hair Clinic); Vitiligo & Psoriasis Clinic

Key equipment: Q-switched Nd:YAG and CO2 lasers; Phototherapy chambers (NB-UVB); Dermoscopy units; Cryotherapy setup; Patch testing panel

Procedures offered: Skin biopsy; Cryotherapy for warts; Laser resurfacing and pigment lasers; Phototherapy for psoriasis/vitiligo; Hair transplant consultation (FUE); Chemical peels; Patch testing for allergy

Ophthalmology

Location: Block H, Floor 2 **Emergency availability:** Yes — 24x7 emergency cover

Complete eye care from refraction to retinal surgery, with a dedicated cataract day-care pathway.

Sub-specialty clinics: Cataract & Refractive Surgery; Retina & Vitreous; Glaucoma Clinic; Cornea Clinic; Paediatric Ophthalmology & Squint

Key equipment: Phacoemulsification systems; Femtosecond LASIK platform; OCT and fundus fluorescein angiography; Green laser for retina; Automated perimetry (visual fields); Slit lamps with imaging

Procedures offered: Phacoemulsification cataract surgery with IOL; LASIK and surface ablation; Intravitreal injections; Retinal laser photocoagulation; Trabeculectomy for glaucoma; Squint correction; Corneal transplantation

ENT (Otorhinolaryngology)

Location: Block H, Floor 3 **Emergency availability:** Yes — 24x7 emergency cover

Disorders of the ear, nose, throat, head and neck, with full audiology and endoscopic sinus surgery services.

Sub-specialty clinics: Otology & Cochlear Implant; Rhinology & Sinus Surgery; Laryngology & Voice Clinic; Head & Neck Surgery; Audiology & Speech Therapy

Key equipment: Audiology suite (PTA, tympanometry, OAE, BERA); Endoscopic sinus surgery navigation; Operating microscopes; Video laryngoscopy and stroboscopy; Cochlear implant programme

Procedures offered: Functional endoscopic sinus surgery (FESS); Tympanoplasty and mastoidectomy; Tonsillectomy and adenoidectomy; Septoplasty; Microlaryngeal surgery; Cochlear implantation; Hearing aid fitting

Psychiatry

Location: Block D, Floor 3 **Emergency availability:** Yes — 24x7 emergency cover

Mental health services for adults, adolescents and the elderly, including de-addiction and neuromodulation.

Sub-specialty clinics: Adult Psychiatry; Child & Adolescent Clinic; De-addiction Services; Geriatric Psychiatry; Clinical Psychology & Counselling

Key equipment: rTMS neuromodulation unit; Modified ECT suite with anaesthesia support; Psychometric assessment lab; Dedicated counselling suites; 10-bed inpatient psychiatry ward

Procedures offered: Structured psychiatric evaluation; Pharmacotherapy with monitoring; Cognitive behavioural therapy (CBT); rTMS sessions; Modified ECT; De-addiction detox and relapse prevention; Family therapy

Pediatrics

Location: Block C, Floor 2 **Emergency availability:** Yes — 24x7 emergency cover

Child health from newborn care to adolescence, including a Level III NICU and paediatric intensive care.

Sub-specialty clinics: Neonatology (NICU); Paediatric Intensive Care (PICU); Growth & Development Clinic; Paediatric Neurology; Vaccination Clinic

Key equipment: Level III NICU (40 beds) with ventilators and incubators; 12-bed PICU; Paediatric bronchoscope; Phototherapy units; Dedicated vaccination cold chain

Procedures offered: Newborn resuscitation and NICU care; Immunisation as per IAP schedule; Growth and developmental assessment; Management of childhood asthma; Neonatal screening; Paediatric procedures under sedation

Obstetrics & Gynecology

Location: Block C, Floor 3 **Emergency availability:** Yes — 24x7 emergency cover

Women's health across pregnancy, childbirth, fertility and gynaecological surgery, with a 24x7 labour suite.

Sub-specialty clinics: High-Risk Pregnancy Unit; Fertility & IVF Clinic; Gynaec Endoscopy; Urogynaecology; Menopause Clinic

Key equipment: 8-room labour delivery suite; 3D/4D obstetric ultrasound; Fetal monitoring (CTG) network; Laparoscopy and hysteroscopy towers; IVF laboratory with incubators

Procedures offered: Normal and assisted vaginal delivery; Caesarean section; Laparoscopic hysterectomy; Hysteroscopy for uterine conditions; IUI and IVF cycles; Colposcopy and cervical biopsy; Family planning procedures

General Surgery

Location: Block B, Floor 2 **Emergency availability:** Yes — 24x7 emergency cover

Broad surgical care of the abdomen, breast, thyroid, hernias and minor procedures with an advanced laparoscopy programme.

Sub-specialty clinics: Laparoscopic Surgery; Breast & Endocrine Surgery; Colorectal Surgery; Day-Care Surgery Unit

Key equipment: 4K laparoscopy towers; Harmonic and vessel-sealing devices; Day-care surgery suite (8 beds); Endoscopic hernia repair sets

Procedures offered: Laparoscopic cholecystectomy; Hernia repair (open and laparoscopic); Appendicectomy; Thyroidectomy; Breast lump excision; Haemorrhoid and fistula surgery; Minor OPD procedures

Internal Medicine

Location: Block A, Floor 2 **Emergency availability:** Yes — 24x7 emergency cover

First-contact adult medicine for fevers, infections, lifestyle diseases and multi-system complaints; the hospital's diagnostic hub.

Sub-specialty clinics: Fever Clinic; Infectious Diseases; Geriatric Medicine; Travel Medicine & Vaccination; Executive Health Check Programme

Key equipment: Point-of-care testing in OPD; Ambulatory BP monitoring; Comprehensive health-check suite; Bedside ultrasound

Procedures offered: Evaluation of fever of unknown origin; Management of dengue, malaria, typhoid; Adult vaccination; Pre-operative fitness evaluation; Executive health check packages; Chronic disease co-ordination

Emergency Medicine

Location: Block G, Floor 0 **Emergency availability:** Yes — 24x7 emergency cover

24x7 emergency and trauma care with structured five-level triage, resuscitation bays and short-stay observation.

Sub-specialty clinics: Adult Emergency; Paediatric Emergency; Trauma Team; Toxicology; Observation Medicine

Key equipment: 6 resuscitation bays with defibrillators and ventilators; Point-of-care lab and portable X-ray; Bedside ultrasound (eFAST); Dedicated CT within the ED; Ambulance fleet with ALS units

Procedures offered: Triage and resuscitation; Emergency intubation and ventilation; Trauma stabilisation (ATLS); Poisoning management; Fracture splinting; Emergency wound care and suturing

Anesthesiology & Pain Medicine

Location: Block B, Floor 5 **Emergency availability:** Yes — 24x7 emergency cover

Perioperative anaesthesia across 32 operating theatres, critical care support, and a dedicated chronic pain clinic.

Sub-specialty clinics: Cardiac Anaesthesia; Neuro Anaesthesia; Obstetric Anaesthesia (Painless Labour); Chronic Pain Clinic; Pre-anaesthesia Check-up (PAC) Clinic

Key equipment: Anaesthesia workstations with depth-of-anaesthesia monitoring; Ultrasound for regional blocks; Fluoroscopy-guided pain intervention suite; Difficult airway cart with video laryngoscopes

Procedures offered: General and regional anaesthesia; Epidural painless labour; Ultrasound-guided nerve blocks; Radiofrequency ablation for chronic pain; Epidural steroid injections; Pre-anaesthesia risk assessment

Radiology & Imaging

Location: Block F, Floor 1 **Emergency availability:** Yes — 24x7 emergency cover

Full-spectrum diagnostic and interventional imaging operating 24x7 for emergencies and inpatients.

Sub-specialty clinics: CT & MRI; Ultrasound & Doppler; Interventional Radiology; Women's Imaging (Mammography); Nuclear Medicine & PET-CT

Key equipment: 3T and 1.5T MRI scanners; 128-slice and 16-slice CT; PET-CT; Digital mammography with tomosynthesis; Biplane cathlab for interventional radiology; 10 ultrasound/Doppler rooms

Procedures offered: MRI, CT, PET-CT reporting; Ultrasound-guided biopsies; Mechanical thrombectomy support; Tumour embolisation; Image-guided drainages; DEXA bone densitometry

Pathology & Laboratory Medicine

Location: Block F, Floor 3 **Emergency availability:** Yes — 24x7 emergency cover

NABL-accredited central laboratory covering biochemistry, haematology, microbiology, histopathology and the blood centre.

Sub-specialty clinics: Clinical Biochemistry; Haematology Lab; Microbiology & Serology; Histopathology & Cytology; Blood Centre & Transfusion Medicine

Key equipment: Fully automated analysers with track system; Automated blood culture systems; Immunohistochemistry platform; Component separation blood bank; Molecular diagnostics (PCR) lab

Procedures offered: Routine and specialised blood testing; Frozen section for intra-operative diagnosis; Bone marrow reporting; Blood grouping and cross-matching; Apheresis and component therapy; Home sample collection service

Rheumatology

Location: Block H, Floor 4 **Emergency availability:** No — scheduled OPD only, refer to Emergency Medicine (Block G) for urgent cases

Autoimmune and inflammatory joint diseases: arthritis, lupus, vasculitis and soft-tissue rheumatism.

Sub-specialty clinics: Inflammatory Arthritis Clinic; Lupus & Connective Tissue Clinic; Vasculitis Clinic; Biologics Day-care

Key equipment: Musculoskeletal ultrasound; Biologic infusion day-care (8 chairs); Capillaroscopy; Joint aspiration suite

Procedures offered: Disease activity scoring and DMARD therapy; Biologic and targeted-synthetic therapy; Joint aspiration and injection; Musculoskeletal ultrasound assessment; Immunosuppression monitoring

Hematology

Location: Block E, Floor 4 **Emergency availability:** Yes — 24x7 emergency cover

Blood disorders from anaemia to leukaemia, with a bone marrow transplant programme.

Sub-specialty clinics: Clinical Haematology; Haemato-oncology; Bone Marrow Transplant Unit; Haemophilia & Thalassemia Clinic

Key equipment: 6-bed HEPA-filtered transplant unit; Flow cytometry; Cytogenetics and molecular lab; Apheresis machines; Day-care transfusion unit

Procedures offered: Bone marrow aspiration and biopsy; Chemotherapy for blood cancers; Autologous and allogeneic transplant; Factor replacement for haemophilia; Regular transfusion programmes; Stem cell harvesting

Physical Medicine & Rehabilitation

Location: Block D, Floor 4 **Emergency availability:** No — scheduled OPD only, refer to Emergency Medicine (Block G) for urgent cases

Restoring function after stroke, spinal injury, joint surgery and chronic musculoskeletal disorders.

Sub-specialty clinics: Neuro-rehabilitation; Musculoskeletal Rehab; Cardio-pulmonary Rehab; Occupational Therapy; Prosthetics & Orthotics

Key equipment: Robotic gait trainer; Hydrotherapy pool; Electrotherapy suites; Balance and vestibular lab; Prosthetic workshop

Procedures offered: Post-stroke rehabilitation programmes; Post-joint-replacement physiotherapy; Cardiac rehabilitation; Spasticity management with injections; Orthotic fitting and gait training; Ergonomic and posture clinics

Dental & Maxillofacial Surgery

Location: Block H, Floor 5 **Emergency availability:** Yes — 24x7 emergency cover

Comprehensive dentistry and surgery of the face and jaws, from fillings to facial trauma reconstruction.

Sub-specialty clinics: Conservative Dentistry & Endodontics; Periodontics; Orthodontics; Oral & Maxillofacial Surgery; Implantology

Key equipment: 12 dental chairs with digital radiography; CBCT (3D dental imaging); Dental implant systems; Maxillofacial trauma plating sets; Laser dentistry unit

Procedures offered: Root canal treatment; Dental implants; Wisdom tooth surgery; Braces and aligners; Jaw fracture fixation; Gum surgery; Smile design and veneers

Neurosurgery

Location: Block D, Floor 5 **Emergency availability:** Yes — 24x7 emergency cover

Surgery of the brain and spine including tumours, aneurysms, trauma and minimally invasive spine procedures.

Sub-specialty clinics: Brain Tumour Surgery; Vascular Neurosurgery; Minimally Invasive Spine; Functional Neurosurgery; Neurotrauma

Key equipment: Neuronavigation system; Intra-operative neuromonitoring; High-end operating microscopes; Endoscopic spine sets; Stereotactic biopsy frame

Procedures offered: Craniotomy for tumours; Aneurysm clipping; Endoscopic discectomy; Spinal instrumentation; VP shunt for hydrocephalus; Deep brain stimulation (with Neurology); Head injury surgery

4. Doctors Directory

The directory below lists 100 consultants across all 26 departments, generated as a representative synthetic roster (names, qualifications and schedules are illustrative). Each entry gives qualification, years of experience, languages spoken, consultation room, fee, and weekly visiting schedule.

Cardiology

Dr. Umakanta Nayak — Head of Department & Senior Consultant

MBBS, MD (Medicine), DM (Cardiology) | 6 years' experience | Languages: Odia, Hindi, English, Bengali

Consults in Block A, Room 203 | Consultation fee: INR 600 | Weekly schedule: Thursday 09:00 AM–12:00 PM; Friday 09:00 AM–12:00 PM

Dr. Farhan Behera — Senior Consultant

MBBS, MD (Medicine), DM (Cardiology) | 13 years' experience | Languages: Odia, Hindi, English

Consults in Block A, Room 504 | Consultation fee: INR 1200 | Weekly schedule: Thursday 02:00 PM–05:00 PM; Friday 09:00 AM–12:00 PM

Dr. Chandrika Samal — Associate Consultant

MBBS, MD (Medicine), DM (Cardiology) | 16 years' experience | Languages: Odia, Hindi, English, Bengali

Consults in Block A, Room 206 | Consultation fee: INR 600 | Weekly schedule: Monday 02:00 PM–05:00 PM; Thursday 02:00 PM–05:00 PM

Dr. Rashmirekha Panda — Consultant

MBBS, MD (Medicine), DM (Cardiology) | 20 years' experience | Languages: Odia, Hindi, English

Consults in Block A, Room 402 | Consultation fee: INR 900 | Weekly schedule: Monday 09:00 AM–12:00 PM; Tuesday 05:00 PM–08:00 PM; Friday 09:00 AM–12:00 PM

Neurology

Dr. Farhan Patra — Head of Department & Senior Consultant

MBBS, MD (Medicine), DM (Neurology) | 9 years' experience | Languages: Odia, Hindi, English, Telugu

Consults in Block D, Room 406 | Consultation fee: INR 700 | Weekly schedule: Tuesday 05:00 PM–08:00 PM; Wednesday 05:00 PM–08:00 PM; Saturday 05:00 PM–08:00 PM

Dr. Ekamra Tripathy — Senior Consultant

MBBS, MD (Medicine), DM (Neurology) | 26 years' experience | Languages: Odia, Hindi, English

Consults in Block D, Room 504 | Consultation fee: INR 700 | Weekly schedule: Tuesday 05:00 PM–08:00 PM; Wednesday 02:00 PM–05:00 PM; Thursday 09:00 AM–12:00 PM

Dr. Chinmay Pradhan — Associate Consultant

MBBS, MD (Medicine), DM (Neurology) | 18 years' experience | Languages: Odia, Hindi, English, Bengali

Consults in Block D, Room 206 | Consultation fee: INR 800 | Weekly schedule: Tuesday 02:00 PM–05:00 PM; Thursday 09:00 AM–12:00 PM; Saturday 09:00 AM–12:00 PM

Dr. Oindrila Parida — Associate Consultant

MBBS, MD (Medicine), DM (Neurology) | 14 years' experience | Languages: Odia, Hindi, English, Telugu

Consults in Block D, Room 304 | Consultation fee: INR 700 | Weekly schedule: Monday 09:00 AM–12:00 PM; Friday 05:00 PM–08:00 PM; Saturday 09:00 AM–12:00 PM

Orthopedics

Dr. Gourav Tripathy — Head of Department & Senior Consultant

MBBS, MS (Orthopaedics) | 8 years' experience | Languages: Odia, Hindi, English, Telugu

Consults in Block B, Room 508 | Consultation fee: INR 900 | Weekly schedule: Monday 05:00 PM–08:00 PM; Saturday 05:00 PM–08:00 PM

Dr. Sudeshna Naik — Consultant

MBBS, MS (Orthopaedics) | 26 years' experience | Languages: Odia, Hindi, English, Bengali

Consults in Block B, Room 307 | Consultation fee: INR 700 | Weekly schedule: Monday 05:00 PM–08:00 PM; Tuesday 09:00 AM–12:00 PM; Wednesday 05:00 PM–08:00 PM

Dr. Umakanta Barik — Senior Consultant

MBBS, MS (Orthopaedics) | 25 years' experience | Languages: Odia, Hindi, English

Consults in Block B, Room 206 | Consultation fee: INR 700 | Weekly schedule: Wednesday 02:00 PM–05:00 PM; Friday 09:00 AM–12:00 PM

Dr. Biswajit Swain — Associate Consultant

Dr. Niranjan Sahu — Head of Department & Senior Consultant

MBBS, MD (Medicine), DM (Clinical Haematology) | 18 years' experience | Languages: Odia, Hindi, English, Telugu

Consults in Block E, Room 507 | Consultation fee: INR 700 | Weekly schedule: Monday 05:00 PM–08:00 PM; Thursday 02:00 PM–05:00 PM; Saturday 02:00 PM–05:00 PM

Dr. Chinmay Sahoo — Senior Consultant

MBBS, MD (Medicine), DM (Clinical Haematology) | 17 years' experience | Languages: Odia, Hindi, English

Consults in Block E, Room 408 | Consultation fee: INR 800 | Weekly schedule: Monday 09:00 AM–12:00 PM; Wednesday 02:00 PM–05:00 PM; Friday 02:00 PM–05:00 PM

Dr. Farhan Bhoi — Senior Consultant

MBBS, MD (Medicine), DM (Clinical Haematology) | 12 years' experience | Languages: Odia, Hindi, English

Consults in Block E, Room 106 | Consultation fee: INR 800 | Weekly schedule: Tuesday 09:00 AM–12:00 PM; Friday 05:00 PM–08:00 PM

Dr. Rajlaxmi Behera — Senior Consultant

MBBS, MD (Medicine), DM (Clinical Haematology) | 13 years' experience | Languages: Odia, Hindi, English, Bengali

Consults in Block E, Room 501 | Consultation fee: INR 900 | Weekly schedule: Tuesday 02:00 PM–05:00 PM; Friday 09:00 AM–12:00 PM

Physical Medicine & Rehabilitation

Dr. Aparajita Mishra — Head of Department & Senior Consultant

MBBS, MD (PMR) | 10 years' experience | Languages: Odia, Hindi, English

Consults in Block D, Room 304 | Consultation fee: INR 1000 | Weekly schedule: Tuesday 09:00 AM–12:00 PM; Wednesday 09:00 AM–12:00 PM

Dr. Eshita Barik — Senior Consultant

MBBS, MD (PMR) | 9 years' experience | Languages: Odia, Hindi, English

Consults in Block D, Room 408 | Consultation fee: INR 1000 | Weekly schedule: Thursday 09:00 AM–12:00 PM; Friday 05:00 PM–08:00 PM

Dr. Aparajita Barik — Senior Consultant

MBBS, MD (PMR) | 15 years' experience | Languages: Odia, Hindi, English, Bengali

Consults in Block D, Room 108 | Consultation fee: INR 1200 | Weekly schedule: Monday 05:00 PM–08:00 PM; Thursday 02:00 PM–05:00 PM; Saturday 09:00 AM–12:00 PM

Dental & Maxillofacial Surgery

Dr. Vivekananda Tripathy — Head of Department & Senior Consultant

BDS, MDS (Oral & Maxillofacial Surgery) | 10 years' experience | Languages: Odia, Hindi, English

Consults in Block H, Room 205 | Consultation fee: INR 1000 | Weekly schedule: Wednesday 02:00 PM–05:00 PM; Friday 05:00 PM–08:00 PM; Saturday 05:00 PM–08:00 PM

Dr. Gourav Nayak — Associate Consultant

BDS, MDS (Oral & Maxillofacial Surgery) | 28 years' experience | Languages: Odia, Hindi, English

Consults in Block H, Room 504 | Consultation fee: INR 1200 | Weekly schedule: Tuesday 02:00 PM–05:00 PM; Wednesday 02:00 PM–05:00 PM; Thursday 02:00 PM–05:00 PM

Dr. Gitanjali Pradhan — Senior Consultant

BDS, MDS (Oral & Maxillofacial Surgery) | 19 years' experience | Languages: Odia, Hindi, English, Telugu

Consults in Block H, Room 303 | Consultation fee: INR 1500 | Weekly schedule: Monday 09:00 AM–12:00 PM; Saturday 02:00 PM–05:00 PM

Dr. Biswajit Sahu — Associate Consultant

BDS, MDS (Oral & Maxillofacial Surgery) | 23 years' experience | Languages: Odia, Hindi, English

Consults in Block H, Room 509 | Consultation fee: INR 1000 | Weekly schedule: Wednesday 05:00 PM–08:00 PM; Thursday 02:00 PM–05:00 PM

Neurosurgery

Dr. Debasis Swain — Head of Department & Senior Consultant

MBBS, MS (Surgery), MCh (Neurosurgery) | 25 years' experience | Languages: Odia, Hindi, English, Telugu
Consults in Block D, Room 109 | Consultation fee: INR 800 | Weekly schedule: Thursday 09:00 AM–12:00 PM; Saturday 09:00 AM–12:00 PM

Dr. Ananya Parida — Consultant

MBBS, MS (Surgery), MCh (Neurosurgery) | 17 years' experience | Languages: Odia, Hindi, English
Consults in Block D, Room 304 | Consultation fee: INR 1200 | Weekly schedule: Wednesday 09:00 AM–12:00 PM; Friday 09:00 AM–12:00 PM

Dr. Chandrika Naik — Senior Consultant

MBBS, MS (Surgery), MCh (Neurosurgery) | 15 years' experience | Languages: Odia, Hindi, English, Telugu
Consults in Block D, Room 103 | Consultation fee: INR 700 | Weekly schedule: Monday 09:00 AM–12:00 PM; Tuesday 05:00 PM–08:00 PM; Saturday 05:00 PM–08:00 PM

Dr. Chittaranjan Samal — Senior Consultant

MBBS, MS (Surgery), MCh (Neurosurgery) | 20 years' experience | Languages: Odia, Hindi, English, Bengali
Consults in Block D, Room 305 | Consultation fee: INR 1000 | Weekly schedule: Monday 09:00 AM–12:00 PM; Tuesday 05:00 PM–08:00 PM

5. Appointment System

OPD appointments can be booked through four channels: the KLIMS Care mobile app (Android and iOS), the hospital website, the appointment call centre, or walk-in registration at any block lobby. Online and phone bookings receive an SMS confirmation with token number, doctor name, room number and reporting time. Slots open 14 days in advance for regular consultants and 30 days in advance for super-specialty clinics such as Fertility and Pain Medicine.

Rescheduling and cancellation are free up to 2 hours before the slot via the app, website or call centre; cancellations made in that window receive a full refund of any prepaid fee within 5–7 working days. If a doctor goes on leave, affected patients are notified by SMS and offered the next available slot with the same doctor or an immediate slot with another consultant in the same department at no extra charge. A five-level triage and digital token system displays the running token outside every consultation room and mirrors it in the app, so patients can wait in the cafeteria and return as their number approaches.

Waiting time is a function of booked slots ahead of you and the average consultation duration for that department (typically 10–15 minutes per patient in general OPDs and 15–25 minutes in super-specialty clinics). Priority counters fast-track senior citizens, pregnant women and persons with disabilities within each token block.

6. Diagnostic & Laboratory Services

KLIMS offers 120 diagnostic tests and procedures across haematology, biochemistry, cardiac diagnostics, imaging, endocrine assays, microbiology, pathology and specialised organ-function studies. Each test below lists its category, the department that typically orders/performs it, patient preparation required, turnaround time (TAT) in hours, and indicative cost in INR.

Test	Category	Dept.	Preparation	TAT (hrs)	Cost (INR)
Complete Blood Count (CBC)	Hematology	Pathology & Laboratory Medicine	No special preparation required	4	350
ESR	Hematology	Pathology & Laboratory Medicine	No special preparation required	4	150
Peripheral Blood Smear	Hematology	Pathology & Laboratory Medicine	No special preparation required	6	300
Reticulocyte Count	Hematology	Hematology	No special preparation required	6	400
PT / INR	Hematology	Pathology & Laboratory Medicine	No special preparation required	4	450
aPTT	Hematology	Pathology & Laboratory Medicine	No special preparation required	4	500
D-Dimer	Hematology	Pathology & Laboratory Medicine	No special preparation required	4	1,200
Serum Iron Studies	Hematology	Hematology	8 hours fasting; morning sample preferred	24	900
Serum Ferritin	Hematology	Hematology	Morning sample preferred; no fasting needed	24	800
Vitamin B12	Hematology	Internal Medicine	8 hours fasting; morning sample preferred	24	900
Serum Folate	Hematology	Hematology	8 hours fasting; morning sample preferred	24	850
Hemoglobin Electrophoresis	Hematology	Hematology	No special preparation required	72	1,400
G6PD Assay	Hematology	Hematology	No special preparation required	48	700
Bone Marrow Aspiration & Biopsy	Hematology	Hematology	6 hours fasting; accompanied by an attendant; consent required	96	6,500
Blood Group & Rh Typing	Hematology	Pathology & Laboratory Medicine	No special preparation required	2	200
Fasting Blood Sugar (FBS)	Biochemistry	Endocrinology	10–12 hours overnight fasting; water permitted	4	120
Post-Prandial Blood Sugar (PPBS)	Biochemistry	Endocrinology	6 hours fasting; diabetic medication guidance from the referring doctor	4	120
HbA1c	Biochemistry	Endocrinology	No special preparation required	6	550
Oral Glucose Tolerance Test (OGTT)	Biochemistry	Endocrinology	10–12 hours overnight fasting; water permitted	6	600

Test	Category	Dept.	Preparation	TAT (hrs)	Cost (INR)
Lipid Profile	Biochemistry	Cardiology	10–12 hours overnight fasting; water permitted	6	700
Liver Function Test (LFT)	Biochemistry	Gastroenterology	8 hours fasting; morning sample preferred	6	650
Kidney Function Test (KFT/RFT)	Biochemistry	Nephrology	No special preparation required	6	600
Serum Electrolytes	Biochemistry	Internal Medicine	No special preparation required	4	450
Serum Uric Acid	Biochemistry	Rheumatology	8 hours fasting; morning sample preferred	6	250
Serum Calcium	Biochemistry	Endocrinology	8 hours fasting; morning sample preferred	6	300
Serum Phosphorus	Biochemistry	Nephrology	8 hours fasting; morning sample preferred	6	300
Serum Magnesium	Biochemistry	Internal Medicine	No special preparation required	6	400
Serum Amylase	Biochemistry	Gastroenterology	No special preparation required	4	500
Serum Lipase	Biochemistry	Gastroenterology	No special preparation required	4	600
Total Protein / Albumin	Biochemistry	Internal Medicine	8 hours fasting; morning sample preferred	6	350
CRP (C-Reactive Protein)	Biochemistry	Internal Medicine	No special preparation required	4	500
Procalcitonin	Biochemistry	Internal Medicine	No special preparation required	6	2,200
Vitamin D (25-OH)	Biochemistry	Endocrinology	No special preparation required	24	1,400
Serum Cortisol (8 AM)	Biochemistry	Endocrinology	Morning sample preferred; no fasting needed	24	900
ACTH	Biochemistry	Endocrinology	Morning sample preferred; no fasting needed	48	1,600
Troponin I	Cardiac	Cardiology	No special preparation required	2	1,100
Troponin T (hs)	Cardiac	Cardiology	No special preparation required	2	1,300
CK-MB	Cardiac	Cardiology	No special preparation required	3	700
Cardiac Enzymes Panel	Cardiac	Cardiology	No special preparation required	3	1,800
BNP / NT-proBNP	Cardiac	Cardiology	No special preparation required	4	2,400
ECG (12-lead)	Cardiac	Cardiology	No special preparation required	1	300
Echocardiogram (2D Echo)	Cardiac	Cardiology	No special preparation required	2	2,200
Treadmill Test (TMT)	Cardiac	Cardiology	No special preparation required	2	2,800
Holter Monitoring (24-hour)	Cardiac	Cardiology	No special preparation required	48	3,500

Test	Category	Dept.	Preparation	TAT (hrs)	Cost (INR)
Coronary Angiography	Cardiac	Cardiology	4–6 hours fasting; recent creatinine report required for contrast	24	18,000
Chest X-Ray (PA view)	Imaging	Radiology & Imaging	Remove all metal objects; inform staff of implants or pacemaker	2	400
X-Ray Joints / Spine	Imaging	Radiology & Imaging	Remove all metal objects; inform staff of implants or pacemaker	2	500
Ultrasound Abdomen & Pelvis	Imaging	Radiology & Imaging	8 hours fasting; morning sample preferred	3	1,400
Ultrasound Pelvis (Female)	Imaging	Radiology & Imaging	Full bladder required; drink 4–5 glasses of water an hour before	3	1,200
Doppler Study (Limb/Carotid)	Imaging	Radiology & Imaging	No special preparation required	4	2,500
CT Head (Plain)	Imaging	Radiology & Imaging	Remove all metal objects; inform staff of implants or pacemaker	3	2,800
CT Chest	Imaging	Radiology & Imaging	Remove all metal objects; inform staff of implants or pacemaker	4	4,500
CT Abdomen (Contrast)	Imaging	Radiology & Imaging	4–6 hours fasting; recent creatinine report required for contrast	6	7,500
HRCT Chest	Imaging	Pulmonology	Remove all metal objects; inform staff of implants or pacemaker	4	5,000
CT Angiography	Imaging	Radiology & Imaging	4–6 hours fasting; recent creatinine report required for contrast	6	9,500
MRI Brain	Imaging	Neurology	Remove all metal objects; inform staff of implants or pacemaker	6	7,500
MRI Spine	Imaging	Orthopedics	Remove all metal objects; inform staff of implants or pacemaker	6	8,000
MRI Knee	Imaging	Orthopedics	Remove all metal objects; inform staff of implants or pacemaker	6	7,000
MR Angiography	Imaging	Neurology	Remove all metal objects; inform staff of implants or pacemaker	8	10,500
PET-CT Whole Body	Imaging	Oncology	6 hours fasting; diabetic medication guidance from the referring doctor	24	22,000
Mammography (Bilateral)	Imaging	Radiology & Imaging	No special preparation required	4	2,200
DEXA Bone Density Scan	Imaging	Endocrinology	No special preparation required	4	2,500
Barium Swallow Study	Imaging	Gastroenterology	8 hours fasting; morning sample preferred	6	1,800
Intravenous Pyelogram (IVP)	Imaging	Urology	4–6 hours fasting; recent creatinine report required for contrast	6	3,200

Test	Category	Dept.	Preparation	TAT (hrs)	Cost (INR)
Fluoroscopy-guided Study	Imaging	Radiology & Imaging	8 hours fasting; morning sample preferred	6	2,800
TSH	Endocrine	Endocrinology	Morning sample preferred; no fasting needed	6	300
Free T3 / Free T4	Endocrine	Endocrinology	Morning sample preferred; no fasting needed	6	700
Parathyroid Hormone (PTH)	Endocrine	Endocrinology	Morning sample preferred; no fasting needed	24	1,500
Serum Prolactin	Endocrine	Endocrinology	Morning sample preferred; no fasting needed	24	700
Serum Testosterone	Endocrine	Endocrinology	Morning sample preferred; no fasting needed	24	900
Serum Estradiol	Endocrine	Obstetrics & Gynecology	Morning sample preferred; no fasting needed	24	850
FSH / LH	Endocrine	Obstetrics & Gynecology	Morning sample preferred; no fasting needed	24	1,000
Fasting Insulin	Endocrine	Endocrinology	10–12 hours overnight fasting; water permitted	24	900
Urine Culture & Sensitivity	Microbiology	Urology	No special preparation required	48	700
Blood Culture & Sensitivity	Microbiology	Internal Medicine	No special preparation required	96	1,400
Sputum Culture & AFB	Microbiology	Pulmonology	Morning sample preferred; no fasting needed	48	800
Widal Test	Microbiology	Internal Medicine	No special preparation required	6	400
Dengue NS1 Antigen	Microbiology	Internal Medicine	No special preparation required	4	900
Malaria Smear / Rapid Antigen	Microbiology	Internal Medicine	No special preparation required	3	450
HIV ELISA	Microbiology	Internal Medicine	No special preparation required	24	600
HBsAg	Microbiology	Gastroenterology	No special preparation required	24	500
Anti-HCV	Microbiology	Gastroenterology	No special preparation required	24	800
VDRL	Microbiology	Dermatology	No special preparation required	24	350
COVID-19 RT-PCR	Microbiology	Pulmonology	No special preparation required	12	600
Stool Routine & Culture	Microbiology	Gastroenterology	No special preparation required	48	500
Throat Swab Culture	Microbiology	ENT (Otorhinolaryngology)	No special preparation required	48	600
Mantoux Test	Microbiology	Pulmonology	No special preparation required	72	300
ASO Titre	Microbiology	Rheumatology	No special preparation required	24	600
FNAC (Fine Needle Aspiration)	Pathology	Pathology & Laboratory Medicine	No special preparation required	48	1,500

Test	Category	Dept.	Preparation	TAT (hrs)	Cost (INR)
Biopsy Histopathology	Pathology	Pathology & Laboratory Medicine	No special preparation required	96	2,500
Pap Smear	Pathology	Obstetrics & Gynecology	No special preparation required	72	800
Urine Routine & Microscopy	Pathology	Nephrology	Morning sample preferred; no fasting needed	4	250
Semen Analysis	Pathology	Urology	No special preparation required	24	900
Pleural Fluid Analysis	Pathology	Pulmonology	No special preparation required	24	1,200
CSF Analysis	Pathology	Neurology	No special preparation required	24	1,500
Synovial Fluid Analysis	Pathology	Rheumatology	No special preparation required	24	1,300
Skin Scraping (KOH Mount)	Pathology	Dermatology	No special preparation required	24	400
Immunohistochemistry Panel	Pathology	Oncology	No special preparation required	120	6,000
EEG (Electroencephalogram)	Specialised	Neurology	No special preparation required	24	2,200
EMG (Electromyography)	Specialised	Neurology	No special preparation required	24	3,000
Nerve Conduction Study (NCS)	Specialised	Neurology	No special preparation required	24	2,800
Spirometry (PFT)	Specialised	Pulmonology	No special preparation required	2	1,200
DLCO (Diffusion Study)	Specialised	Pulmonology	No special preparation required	4	2,200
Sleep Study (Polysomnography)	Specialised	Pulmonology	6 hours fasting; accompanied by an attendant; consent required	48	9,500
Bronchoscopy	Specialised	Pulmonology	6 hours fasting; accompanied by an attendant; consent required	24	8,500
Upper GI Endoscopy	Specialised	Gastroenterology	8 hours fasting; morning sample preferred	6	3,800
Colonoscopy	Specialised	Gastroenterology	Bowel preparation solution the previous evening as instructed	6	6,500
Sigmoidoscopy	Specialised	Gastroenterology	Bowel preparation solution the previous evening as instructed	6	3,500
ERCP	Specialised	Gastroenterology	6 hours fasting; accompanied by an attendant; consent required	24	16,000
Liver FibroScan	Specialised	Gastroenterology	8 hours fasting; morning sample preferred	2	2,800
Pure Tone Audiometry (PTA)	Specialised	ENT (Otorhinolaryngology)	No special preparation required	2	800
Tympanometry	Specialised	ENT (Otorhinolaryngology)	No special preparation required	2	700
Visual Field Test (Perimetry)	Specialised	Ophthalmology	No special preparation required	2	1,400

Test	Category	Dept.	Preparation	TAT (hrs)	Cost (INR)
OCT Retina	Specialised	Ophthalmology	No special preparation required	2	2,000
Fundus Fluorescein Angiography	Specialised	Ophthalmology	No special preparation required	4	2,800
Urodynamic Study	Specialised	Urology	Full bladder required; drink 4–5 glasses of water an hour before	24	5,500
Cystoscopy	Specialised	Urology	6 hours fasting; accompanied by an attendant; consent required	24	6,000
Endoscopic Ultrasound (EUS)	Specialised	Gastroenterology	6 hours fasting; accompanied by an attendant; consent required	24	12,000
Capsule Endoscopy	Specialised	Gastroenterology	Bowel preparation solution the previous evening as instructed	48	32,000
Allergy Panel (Specific IgE)	Specialised	Pulmonology	No special preparation required	72	4,500

7. Symptom → Specialty Mapping

This section is the core semantic routing layer: it maps common patient-reported symptoms to the correct department, with explicit disambiguation notes where a symptom could plausibly route to more than one specialty.

Total mapped symptom entries: 130, spanning all 26 departments.

Cardiology

Symptom	Route to / Notes
Chest pain or heaviness radiating to the left arm or jaw	Cardiology — not Orthopedics; rule out cardiac cause first
Breathlessness on exertion or on lying flat	Cardiology, Block A Floor 3
Palpitations or irregular heartbeat	Cardiology, Block A Floor 3
Fainting spells (syncope)	Cardiology first; Neurology if seizure suspected
Swelling of both feet with breathlessness	Cardiology — not Dermatology
Very high blood pressure reading	Cardiology, Block A Floor 3
Bluish lips or fingertips on exertion	Cardiology, Block A Floor 3

Neurology

Symptom	Route to / Notes
Sudden one-sided weakness or facial droop	EMERGENCY — call 1066; stroke pathway, Neurology
Recurrent seizures or fits	Neurology, Block D Floor 2
Chronic or severe headache	Neurology — Ophthalmology only if vision screening needed
Tremors of hands or slowness of movement	Neurology, Block D Floor 2
Numbness or tingling in hands and feet	Neurology — Endocrinology if diabetic
Memory loss or confusion in the elderly	Neurology, Block D Floor 2
Loss of balance while walking	Neurology — not ENT unless spinning vertigo

Orthopedics

Symptom	Route to / Notes
Joint pain or swelling (knee, hip, shoulder)	Orthopedics — Rheumatology if multiple joints with morning stiffness
Back pain radiating to the leg	Orthopedics, Block B Floor 3
Injury with suspected fracture	Emergency first if severe; then Orthopedics
Difficulty walking after a fall	Orthopedics, Block B Floor 3
Sports injury of the knee or ankle	Orthopedics, Block B Floor 3
Neck pain radiating to the arm	Orthopedics — Neurology if weakness present

Gastroenterology

Symptom	Route to / Notes
Heartburn or acid regurgitation	Gastroenterology, Block I Floor 2
Abdominal pain with bloating	Gastroenterology — Gynecology for lower abdominal pain in women
Vomiting of blood or black stools	EMERGENCY — then Gastroenterology

Symptom	Route to / Notes
Jaundice (yellow eyes or urine)	Gastroenterology/Hepatology — not Ophthalmology
Chronic constipation or diarrhoea	Gastroenterology, Block I Floor 2
Difficulty swallowing	Gastroenterology — ENT if throat-level sticking

Pulmonology

Symptom	Route to / Notes
Cough lasting more than two weeks	Pulmonology, Block I Floor 3
Wheezing or whistling breath	Pulmonology, Block I Floor 3
Loud snoring with daytime sleepiness	Pulmonology (Sleep Clinic) — ENT if nasal blockage predominant
Coughing up blood	Urgent Pulmonology review
Breathlessness with chest tightness	Pulmonology — Cardiology if exertional chest pain

Nephrology

Symptom	Route to / Notes
Swelling of face or feet with frothy urine	Nephrology, Block I Floor 4
Reduced urine output	Nephrology, Block I Floor 4
High creatinine on testing	Nephrology, Block I Floor 4
Flank pain with blood in urine	Nephrology or Urology — Urology if stone suspected

Urology

Symptom	Route to / Notes
Burning urination or frequent urination	Urology — Gynecology for women with discharge
Blood in urine	Urology; Nephrology if with swelling/protein
Poor urinary stream in older men	Urology, Block B Floor 4
Severe flank pain radiating to groin	Urology (stone) — Emergency if intolerable
Swelling or lump in the scrotum	Urology, Block B Floor 4

Oncology

Symptom	Route to / Notes
Painless lump in the breast	Oncology breast clinic — do not wait
Unexplained weight loss with fatigue	Internal Medicine first; Oncology if malignancy suspected
Non-healing ulcer in the mouth	Oncology — Dental first if clearly dental cause
Enlarged painless lymph nodes	Oncology, Block E Floor 2
Blood in stool with altered bowel habit	Gastroenterology for colonoscopy; Oncology if confirmed

Endocrinology

Symptom	Route to / Notes
Excessive thirst and frequent urination	Endocrinology, Block I Floor 5

Symptom	Route to / Notes
Unexplained weight gain or weight loss	Endocrinology — Oncology if weight loss with red flags
Neck swelling (thyroid)	Endocrinology — ENT if swallowing difficulty
Excess facial hair or irregular periods in young women	Endocrinology or Obstetrics & Gynecology
Low or high blood sugar readings	Endocrinology, Block I Floor 5

Dermatology

Symptom	Route to / Notes
Itchy skin rash	Dermatology, Block H Floor 1
Hair fall or bald patches	Dermatology, Block H Floor 1
White patches on skin	Dermatology — not a fungal infection by default
Nail discolouration or brittleness	Dermatology, Block H Floor 1
Acne or facial pigmentation	Dermatology, Block H Floor 1

Ophthalmology

Symptom	Route to / Notes
Blurred or diminished vision	Ophthalmology, Block H Floor 2
Red eye with discharge	Ophthalmology, Block H Floor 2
Sudden loss of vision	EMERGENCY — immediate Ophthalmology review
Floaters or flashes of light	Ophthalmology, Block H Floor 2
Eye pain with headache and halos	Ophthalmology (acute glaucoma) — not Neurology first

ENT (Otorhinolaryngology)

Symptom	Route to / Notes
Ear pain or ear discharge	ENT (Otorhinolaryngology), Block H Floor 3
Hearing difficulty or ringing in ears (tinnitus)	ENT (Otorhinolaryngology), Block H Floor 3
Blocked nose or recurrent sinus headache	ENT — Neurology if migraine features
Spinning sensation (vertigo)	ENT — Neurology if with weakness or double vision
Hoarseness of voice beyond 3 weeks	ENT (Otorhinolaryngology), Block H Floor 3
Recurrent sore throat	ENT (Otorhinolaryngology), Block H Floor 3

Psychiatry

Symptom	Route to / Notes
Persistent sadness or loss of interest	Psychiatry, Block D Floor 3
Excessive worry or panic attacks	Psychiatry — Cardiology first if chest pain during panic to rule out cardiac cause
Sleep disturbances	Psychiatry — Pulmonology sleep lab if snoring/apnea
Alcohol or substance dependence	Psychiatry, Block D Floor 3
Hearing voices or unusual suspiciousness	Psychiatry, Block D Floor 3

Pediatrics

Symptom	Route to / Notes
Fever in a child	Pediatrics, Block C Floor 2
Child with cough and fast breathing	Pediatrics, Block C Floor 2
Loose motions or vomiting in a child	Pediatrics, Block C Floor 2
Poor weight gain in a child	Pediatrics, Block C Floor 2
Seizure in a child	EMERGENCY first; then Pediatrics
Delayed milestones	Pediatrics (Development Clinic)

Obstetrics & Gynecology

Symptom	Route to / Notes
Pregnancy care / antenatal check-up	Obstetrics & Gynecology, Block C Floor 3
Heavy or irregular periods	Obstetrics & Gynecology, Block C Floor 3
Lower abdominal pain in women	ObGyn — Gastroenterology if bowel-related
White discharge or itching	Obstetrics & Gynecology, Block C Floor 3
Difficulty conceiving	ObGyn Fertility Clinic
Something coming down the vagina	Obstetrics & Gynecology, Block C Floor 3

General Surgery

Symptom	Route to / Notes
Swelling in the groin or navel (hernia)	General Surgery, Block B Floor 2
Right lower abdominal pain with fever	Emergency then General Surgery (appendicitis)
Bleeding during defecation	General Surgery — Gastroenterology for colonoscopy if age > 45
Lump anywhere on the body	General Surgery, Block B Floor 2
Ingrown toenail or abscess	General Surgery, Block B Floor 2

Internal Medicine

Symptom	Route to / Notes
Fever (adult)	Internal Medicine — Pediatrics for children under 15
Generalised weakness or fatigue	Internal Medicine, Block A Floor 2
Body ache with chills	Internal Medicine, Block A Floor 2
Routine health check-up	Internal Medicine (Executive Health Check)
Multiple vague complaints	Internal Medicine as the right starting point

Emergency Medicine

Symptom	Route to / Notes
Any life-threatening emergency	Call 1066 — Emergency Department, Block G
Road accident or major injury	Emergency Medicine, Block G Floor 0
Sudden severe chest pain with sweating	Emergency — cardiac pathway activated on arrival
Poisoning or overdose	Emergency Medicine, Block G Floor 0
Severe allergic reaction	Emergency Medicine, Block G Floor 0

Anesthesiology & Pain Medicine

Symptom	Route to / Notes
Chronic pain not responding to painkillers	Pain Clinic (Anesthesiology)
Request for painless delivery	Obstetric Anaesthesia via ObGyn
Fitness assessment before surgery	PAC Clinic, Block B Floor 5
Electric-shock like facial pain	Pain Clinic — not Dental unless tooth source found

Radiology & Imaging

Symptom	Route to / Notes
Doctor advised ct/mri/ultrasound	Radiology, Block F — bring the request slip
Screening mammogram	Women's Imaging, Block F Floor 2
Needle biopsy under image guidance	Interventional Radiology

Pathology & Laboratory Medicine

Symptom	Route to / Notes
Blood test as advised by a doctor	Sample Collection Lounge, Block F Ground Floor — 24x7
Blood donation	Blood Centre, Block F Floor 3
Collect lab reports	Report counter or online portal

Rheumatology

Symptom	Route to / Notes
Pain in multiple small joints with morning stiffness	Rheumatology — not Orthopedics
Recurring red painful big toe (gout)	Rheumatology, Block H Floor 4
Young person with low back stiffness improving on activity	Rheumatology — not Orthopedics
Facial butterfly rash with joint pains	Rheumatology, Block H Floor 4
Widespread body pain with fatigue	Rheumatology, Block H Floor 4

Hematology

Symptom	Route to / Notes
Easy bruising or prolonged bleeding	Hematology, Block E Floor 4
Very low haemoglobin not improving with iron	Hematology, Block E Floor 4
Abnormal blood counts on routine testing	Hematology, Block E Floor 4
Child requiring repeated transfusions	Hematology (Thalassemia Clinic)

Physical Medicine & Rehabilitation

Symptom	Route to / Notes
Physiotherapy after surgery or stroke	PM&R, Block D Floor 4
Posture-related neck or back pain	PM&R; — Orthopedics if radiating pain
Need for artificial limb or brace	Prosthetics & Orthotics unit

Symptom	Route to / Notes
Child with delayed walking and stiffness	PM&R; with Pediatrics

Dental & Maxillofacial Surgery

Symptom	Route to / Notes
Toothache or sensitivity	Dental & Maxillofacial Surgery, Block H Floor 5
Bleeding gums	Dental & Maxillofacial Surgery, Block H Floor 5
Jaw pain or clicking	Dental (TMJ Clinic) — ENT if ear symptoms dominate
Facial injury involving teeth or jaw	Emergency then Maxillofacial Surgery
Crooked teeth needing braces	Dental & Maxillofacial Surgery, Block H Floor 5

Neurosurgery

Symptom	Route to / Notes
Worst-ever sudden headache	EMERGENCY — possible aneurysm bleed
Progressive headache with morning vomiting	Neurosurgery/Neurology urgent review
Mri showing brain or spine lesion needing surgery	Neurosurgery, Block D Floor 5
Head injury with vomiting or drowsiness	Emergency then Neurosurgery

8. Medical Conditions Encyclopedia

Top conditions managed by each department, with typical presenting symptoms and the standard treatment approach at KLIMS. This is a patient-education summary, not a clinical protocol.

Cardiology

Coronary Artery Disease

Typical presentation: chest pain on exertion; breathlessness; left arm or jaw discomfort

Treatment approach: Medication, angioplasty with stenting, or bypass surgery referral depending on angiography findings

Hypertension

Typical presentation: often silent; headache; giddiness; blurred vision in severe cases

Treatment approach: Lifestyle modification and stepped antihypertensive therapy with home BP monitoring

Heart Failure

Typical presentation: breathlessness on lying down; swelling of feet; fatigue

Treatment approach: Guideline-directed medical therapy, device therapy (CRT) in selected patients, heart failure clinic follow-up

Arrhythmia / Atrial Fibrillation

Typical presentation: palpitations; irregular pulse; episodes of fainting

Treatment approach: Rate/rhythm control drugs, anticoagulation, electrophysiology ablation for refractory cases

Valvular Heart Disease

Typical presentation: breathlessness; palpitations; history of rheumatic fever

Treatment approach: Echo surveillance, balloon valvotomy, surgical or transcatheter valve replacement

Congenital Heart Disease (adult)

Typical presentation: bluish discolouration in childhood; murmur detected on screening

Treatment approach: Device closure of septal defects or surgical correction after cardiac catheterization

Neurology

Ischemic Stroke

Typical presentation: sudden weakness of one side; slurred speech; facial droop

Treatment approach: Time-critical thrombolysis or thrombectomy, stroke unit care and rehabilitation

Epilepsy

Typical presentation: recurrent seizures; brief blank spells; tongue bite during episodes

Treatment approach: Anti-seizure medication titration; video EEG and surgical evaluation for refractory cases

Migraine

Typical presentation: throbbing one-sided headache; nausea; sensitivity to light

Treatment approach: Lifestyle triggers review, acute and preventive medication, Botox for chronic migraine

Parkinson's Disease

Typical presentation: tremor at rest; slowness of movement; stiffness

Treatment approach: Dopaminergic therapy, physiotherapy, deep brain stimulation referral in advanced disease

Peripheral Neuropathy

Typical presentation: numbness and tingling in feet; burning sensation at night

Treatment approach: Treat underlying cause (commonly diabetes), neuropathic pain agents, foot care education

Multiple Sclerosis

Typical presentation: episodes of visual loss; limb weakness that comes and goes

Treatment approach: Disease-modifying therapy, relapse management with steroids, MRI surveillance

Orthopedics

Osteoarthritis of the Knee

Typical presentation: knee pain on walking or stairs; morning stiffness; joint swelling

Treatment approach: Physiotherapy, weight management, intra-articular injections, knee replacement in advanced disease

Lumbar Disc Prolapse

Typical presentation: low back pain radiating down the leg; numbness of foot

Treatment approach: Structured physiotherapy, pain management, microdiscectomy if neurological deficit

Fractures

Typical presentation: pain, swelling and deformity after injury

Treatment approach: Closed reduction and casting or surgical fixation depending on the fracture pattern

Osteoporosis

Typical presentation: fragility fractures; loss of height; back pain in the elderly

Treatment approach: Calcium/vitamin D optimisation, anti-resorptive therapy, fall prevention counselling

Frozen Shoulder

Typical presentation: shoulder stiffness and night pain; difficulty combing hair

Treatment approach: Graded physiotherapy, hydrodilatation, arthroscopic release for resistant cases

Sports Ligament Injuries

Typical presentation: knee giving way after a twisting injury; swelling

Treatment approach: RICE protocol, bracing, arthroscopic ligament reconstruction for the active patient

Gastroenterology

GERD (Acid Reflux)

Typical presentation: heartburn; regurgitation; chest burning after meals

Treatment approach: Lifestyle change, acid suppression therapy, endoscopy if alarm symptoms

Peptic Ulcer Disease

Typical presentation: upper abdominal pain relieved or worsened by food; dark stools

Treatment approach: H. pylori eradication, acid suppression, endoscopic therapy for bleeding ulcers

Gallstone Disease

Typical presentation: right upper abdominal pain after fatty meals; nausea

Treatment approach: ERCP for duct stones and referral for laparoscopic cholecystectomy

Chronic Liver Disease / Cirrhosis

Typical presentation: jaundice; abdominal distension; blood vomiting

Treatment approach: Aetiology-directed therapy, variceal surveillance, transplant work-up in advanced disease

Irritable Bowel Syndrome

Typical presentation: alternating constipation and loose stools; bloating; pain relieved by defecation

Treatment approach: Dietary modification (low-FODMAP), gut-directed therapy, reassurance after red-flag screening

Inflammatory Bowel Disease

Typical presentation: chronic diarrhoea with blood; weight loss; abdominal pain

Treatment approach: 5-ASA agents, immunomodulators, biologics with IBD clinic monitoring

Pulmonology

Bronchial Asthma

Typical presentation: episodic wheeze; cough worse at night; chest tightness

Treatment approach: Inhaler-based controller therapy, trigger avoidance, asthma action plan

COPD

Typical presentation: chronic smoker's cough; progressive breathlessness

Treatment approach: Bronchodilator inhalers, pulmonary rehabilitation, oxygen assessment

Pulmonary Tuberculosis

Typical presentation: cough beyond two weeks; evening fever; weight loss

Treatment approach: Directly observed anti-tubercular therapy with adherence counselling and contact screening

Obstructive Sleep Apnea

Typical presentation: loud snoring; daytime sleepiness; witnessed pauses in breathing

Treatment approach: Sleep study confirmation, CPAP therapy, weight reduction

Interstitial Lung Disease

Typical presentation: dry cough; breathlessness; velcro crackles on examination

Treatment approach: HRCT-based diagnosis, antifibrotics or immunosuppression, oxygen support

Pleural Effusion

Typical presentation: breathlessness; chest heaviness on one side

Treatment approach: Diagnostic tap, treat underlying cause, drainage or pleurodesis when indicated

Nephrology

Chronic Kidney Disease

Typical presentation: swelling of feet; reduced urine output; fatigue; itching

Treatment approach: Blood pressure and diabetes control, dietary protein guidance, planned dialysis access

Kidney Stones (medical)

Typical presentation: flank pain radiating to groin; blood in urine

Treatment approach: Hydration and medical expulsion therapy; Urology referral for intervention

Nephrotic Syndrome

Typical presentation: frothy urine; puffiness of face; marked leg swelling

Treatment approach: Kidney biopsy-guided immunosuppression and supportive therapy

Acute Kidney Injury

Typical presentation: sudden drop in urine output after illness or drugs

Treatment approach: Identify and treat cause, fluid management, temporary dialysis if needed

Diabetic Kidney Disease

Typical presentation: long-standing diabetes with protein in urine

Treatment approach: Intensive glycaemic and BP control, SGLT2 inhibitors, nephrology co-follow-up

Hypertensive Kidney Disease

Typical presentation: poorly controlled BP with rising creatinine

Treatment approach: Structured antihypertensive regimen and progression monitoring

Urology

Urinary Stones

Typical presentation: severe colicky flank pain; vomiting; blood in urine

Treatment approach: ESWL, ureteroscopy or PCNL based on stone size and location; prevention counselling

Benign Prostatic Hyperplasia

Typical presentation: poor urinary stream; night-time frequency; incomplete emptying

Treatment approach: Medical therapy first; TURP or laser enucleation for refractory symptoms

Urinary Tract Infection (complicated)

Typical presentation: burning urination; fever; lower abdominal pain

Treatment approach: Culture-guided antibiotics and imaging to rule out obstruction

Prostate Cancer (suspicion)

Typical presentation: raised PSA; abnormal digital examination

Treatment approach: MRI-fusion biopsy and staging; surgery, radiation or surveillance via uro-oncology board

Erectile Dysfunction

Typical presentation: difficulty achieving or maintaining erection

Treatment approach: Andrology evaluation, vascular and hormonal work-up, stepped therapy

Urinary Incontinence

Typical presentation: leakage on coughing or urgency to void

Treatment approach: Urodynamics-guided therapy: pelvic floor training, medication or sling surgery

Oncology

Breast Cancer

Typical presentation: painless breast lump; nipple discharge; skin dimpling

Treatment approach: Triple assessment, surgery, chemotherapy/targeted therapy and radiotherapy per stage

Lung Cancer

Typical presentation: persistent cough; blood in sputum; weight loss

Treatment approach: Biopsy and molecular profiling; surgery, radiotherapy, chemo-immunotherapy per stage

Colorectal Cancer

Typical presentation: change in bowel habit; blood in stool; anaemia

Treatment approach: Colonoscopic diagnosis, staging, surgery with adjuvant therapy

Cervical Cancer

Typical presentation: post-coital bleeding; foul discharge

Treatment approach: Staging examination, chemoradiation or surgery; HPV vaccination counselling for family

Head & Neck Cancer

Typical presentation: non-healing mouth ulcer; hoarseness; neck node

Treatment approach: Biopsy, staging, organ-preserving chemoradiation or surgery

Lymphoma

Typical presentation: painless enlarging neck/armpit nodes; night sweats

Treatment approach: Excision biopsy, PET-CT staging, chemotherapy with curative intent in most subtypes

Endocrinology

Type 2 Diabetes Mellitus

Typical presentation: excessive thirst; frequent urination; fatigue; often silent

Treatment approach: Lifestyle therapy, oral agents and injectables, annual complication screening

Hypothyroidism

Typical presentation: weight gain; cold intolerance; hair fall; lethargy

Treatment approach: Levothyroxine replacement with periodic TSH monitoring

Hyperthyroidism

Typical presentation: weight loss with good appetite; tremors; palpitations

Treatment approach: Anti-thyroid drugs, radioiodine or surgery per cause

PCOS

Typical presentation: irregular periods; acne; excess facial hair

Treatment approach: Lifestyle modification, cycle regulation, fertility planning with ObGyn

Obesity

Typical presentation: BMI above 30 with fatigue or snoring

Treatment approach: Medical weight management, pharmacotherapy, bariatric surgery referral where indicated

Osteoporosis (metabolic)

Typical presentation: fragility fracture; low DEXA score

Treatment approach: Calcium, vitamin D and anti-resorptive/anabolic therapy

Dermatology

Acne Vulgaris

Typical presentation: pimples on face, chest or back; scarring

Treatment approach: Topical and oral therapy graded to severity; scar management with lasers

Psoriasis

Typical presentation: scaly red plaques on elbows, knees and scalp

Treatment approach: Topicals, phototherapy, systemic and biologic therapy for extensive disease

Atopic Dermatitis / Eczema

Typical presentation: itchy dry skin; recurrent flexural rash

Treatment approach: Emollient-first therapy, topical anti-inflammatories, trigger identification

Fungal Skin Infection

Typical presentation: itchy ring-shaped rash in folds

Treatment approach: Confirmed by KOH scraping; adequate-duration antifungal therapy and hygiene advice

Vitiligo

Typical presentation: progressive white patches of skin

Treatment approach: Topical therapy, NB-UVB phototherapy, surgical grafting for stable patches

Urticaria (Hives)

Typical presentation: itchy wheals that come and go

Treatment approach: Antihistamine ladder and trigger work-up; referral for chronic refractory cases

Ophthalmology

Cataract

Typical presentation: gradually diminishing vision; glare while driving at night

Treatment approach: Day-care phacoemulsification with intraocular lens implantation

Refractive Error

Typical presentation: blurred vision for distance or near

Treatment approach: Spectacles, contact lenses, or LASIK after suitability work-up

Glaucoma

Typical presentation: often silent; gradual field loss; eye pain in acute attack

Treatment approach: Pressure-lowering drops, laser, or filtering surgery with lifelong monitoring

Diabetic Retinopathy

Typical presentation: floaters; fluctuating vision in a diabetic

Treatment approach: Retinal laser, intravitreal injections, vitrectomy in advanced disease

Dry Eye Disease

Typical presentation: gritty burning eyes; worse with screens

Treatment approach: Tear substitutes, lid hygiene, environment and screen-habit changes

Conjunctivitis

Typical presentation: red sticky eyes; discharge

Treatment approach: Supportive care or antibiotic drops; hygiene advice to limit spread

ENT (Otorhinolaryngology)

Chronic Sinusitis

Typical presentation: nasal blockage; facial pressure; post-nasal drip

Treatment approach: Medical therapy first; FESS for anatomical obstruction or polyps

Chronic Otitis Media

Typical presentation: recurring ear discharge; hearing loss

Treatment approach: Ear hygiene, topical therapy, tympanoplasty/mastoidectomy for cure

Hearing Loss

Typical presentation: difficulty following conversation; TV volume high

Treatment approach: Audiology work-up; wax removal, hearing aids or implant per cause

Tonsillitis (recurrent)

Typical presentation: repeated sore throat with fever

Treatment approach: Symptomatic care; tonsillectomy for frequent documented episodes

Vertigo (BPPV)

Typical presentation: brief spinning on turning in bed

Treatment approach: Diagnostic positional tests and canalith repositioning manoeuvres

Voice Disorders

Typical presentation: persistent hoarseness beyond three weeks

Treatment approach: Stroboscopy, voice therapy, microlaryngeal surgery for lesions

Psychiatry

Major Depression

Typical presentation: persistent low mood; loss of interest; sleep and appetite change

Treatment approach: Antidepressants plus CBT; rTMS/ECT for resistant or severe cases

Anxiety Disorders

Typical presentation: excessive worry; restlessness; panic episodes

Treatment approach: CBT, relaxation training, and medication where indicated

Bipolar Disorder

Typical presentation: episodes of elevated mood alternating with depression

Treatment approach: Mood stabilisers with psychoeducation and relapse-signature monitoring

Schizophrenia

Typical presentation: hearing voices; suspiciousness; social withdrawal

Treatment approach: Antipsychotic therapy, family psychoeducation, rehabilitation

Substance Use Disorder

Typical presentation: inability to cut down alcohol/tobacco/drugs; withdrawal symptoms

Treatment approach: Medically supervised detox, anti-craving medication, relapse prevention programme

Sleep Disorders (Insomnia)

Typical presentation: difficulty falling or staying asleep

Treatment approach: Sleep hygiene, CBT-I, and short-term medication only when necessary

Pediatrics

Neonatal Jaundice

Typical presentation: yellow skin in the first week of life

Treatment approach: Bilirubin monitoring, phototherapy, exchange transfusion rarely

Childhood Asthma

Typical presentation: recurrent cough and wheeze; night symptoms

Treatment approach: Inhaled controller therapy with spacer training and school action plan

Acute Gastroenteritis

Typical presentation: loose stools and vomiting; risk of dehydration

Treatment approach: ORS-first rehydration, zinc, feeding continuation; IV fluids if severe

Febrile Seizures

Typical presentation: brief seizure with high fever in 6 months–5 years

Treatment approach: Parental reassurance and fever control; neurology referral for atypical events

Malnutrition / Failure to Thrive

Typical presentation: poor weight gain; falling growth curve

Treatment approach: Structured nutrition rehabilitation and underlying-cause evaluation

Congenital Heart Disease (children)

Typical presentation: poor feeding; bluish spells; recurrent chest infections

Treatment approach: Echo diagnosis and paediatric cardiology pathway for timing of correction

Obstetrics & Gynecology

High-Risk Pregnancy

Typical presentation: pregnancy with diabetes, hypertension or twins

Treatment approach: Intensified antenatal surveillance, planned delivery in tertiary set-up

Fibroid Uterus

Typical presentation: heavy periods; pelvic heaviness

Treatment approach: Medical control, myomectomy or hysterectomy per age and fertility wishes

PCOS (gynaec)

Typical presentation: irregular cycles; difficulty conceiving

Treatment approach: Cycle regulation, ovulation induction, lifestyle programme with Endocrinology

Infertility

Typical presentation: inability to conceive after one year

Treatment approach: Couple evaluation, ovulation induction, IUI/IVF pathway

Menstrual Disorders

Typical presentation: heavy, painful or irregular periods

Treatment approach: Hormonal work-up, medical therapy, hysteroscopy for structural causes

Prolapse / Urinary Leakage

Typical presentation: something coming down; leakage on coughing

Treatment approach: Pelvic floor training, pessary, or reconstructive surgery

General Surgery

Gallstones (surgical)

Typical presentation: recurrent right upper abdominal pain

Treatment approach: Laparoscopic cholecystectomy, usually day-care or one-night stay

Hernia

Typical presentation: reducible groin or umbilical swelling; dragging pain

Treatment approach: Mesh repair — open or laparoscopic based on anatomy

Appendicitis

Typical presentation: migrating right lower abdominal pain; fever; vomiting

Treatment approach: Emergency laparoscopic appendicectomy

Piles / Fissure / Fistula

Typical presentation: bleeding per rectum; painful defecation

Treatment approach: Diet and medical care first; stapler or laser surgery for advanced grades

Thyroid Nodule (surgical)

Typical presentation: neck swelling moving with swallowing

Treatment approach: FNAC-guided decision; hemi- or total thyroidectomy when indicated

Breast Lump (benign)

Typical presentation: mobile painless lump in young women

Treatment approach: Triple assessment; excision when indicated with cosmetic incision planning

Internal Medicine

Dengue Fever

Typical presentation: high fever; body ache; rash; low platelets

Treatment approach: Hydration-focused monitoring with platelet surveillance; hospitalisation for warning signs

Typhoid

Typical presentation: step-ladder fever; abdominal discomfort

Treatment approach: Culture-guided antibiotics and hydration

Malaria

Typical presentation: fever with chills and rigors

Treatment approach: Species-directed antimalarials after peripheral smear/antigen confirmation

Anaemia

Typical presentation: easy fatigue; pallor; breathlessness on exertion

Treatment approach: Cause-directed therapy — iron, B12 or referral for marrow evaluation

Fever of Unknown Origin

Typical presentation: fever beyond two weeks without a clear source

Treatment approach: Protocolised staged work-up spanning cultures, imaging and markers

Lifestyle Disease Cluster

Typical presentation: obesity with high BP, sugar and cholesterol

Treatment approach: Integrated risk-factor management with diet, activity and pharmacotherapy

Emergency Medicine

Polytrauma

Typical presentation: road traffic accident with multiple injuries

Treatment approach: ATLS-driven stabilisation, imaging, and damage-control surgery activation

Acute Poisoning

Typical presentation: accidental or intentional ingestion

Treatment approach: Decontamination, antidotes and toxicology-guided supportive care

Anaphylaxis

Typical presentation: sudden rash, swelling and breathing difficulty after exposure

Treatment approach: Immediate adrenaline, airway protection, observation

Acute Coronary Syndrome (first contact)

Typical presentation: crushing chest pain with sweating

Treatment approach: ECG within 10 minutes, cardiology activation for primary PCI

Snake Bite

Typical presentation: bite with swelling or bleeding tendency

Treatment approach: Anti-snake venom protocol with ICU backup

Heat Stroke

Typical presentation: high body temperature with confusion in summer

Treatment approach: Rapid active cooling and organ support

Anesthesiology & Pain Medicine

Chronic Low Back Pain

Typical presentation: back pain beyond three months not responding to therapy

Treatment approach: Multimodal plan: targeted injections, radiofrequency ablation, rehabilitation

Trigeminal Neuralgia

Typical presentation: electric-shock face pain triggered by touch

Treatment approach: Medication first; radiofrequency or balloon procedures for refractory pain

Cancer Pain

Typical presentation: persistent pain in advanced malignancy

Treatment approach: WHO ladder pharmacotherapy plus interventional blocks with palliative care

Post-herpetic Neuralgia

Typical presentation: burning pain after shingles rash heals

Treatment approach: Neuropathic agents, patches and sympathetic blocks

Labour Pain

Typical presentation: painful contractions during childbirth

Treatment approach: Epidural painless labour on request, coordinated with the obstetric team

Complex Regional Pain Syndrome

Typical presentation: disproportionate limb pain after injury

Treatment approach: Graded rehabilitation with sympathetic blocks and neuromodulation referral

Radiology & Imaging

Imaging for Stroke

Typical presentation: urgent CT/MRI within the golden hour

Treatment approach: 24x7 stroke imaging slot protected for the ED

Cancer Staging

Typical presentation: whole-body assessment before therapy

Treatment approach: PET-CT with structured tumour-board reporting

Breast Screening

Typical presentation: screening after 40 or lump evaluation

Treatment approach: Mammography with same-visit ultrasound correlation

Vascular Blockages

Typical presentation: leg pain on walking; non-healing ulcer

Treatment approach: Doppler and CT angiography; endovascular therapy via IR

Liver Lesions

Typical presentation: incidental lesion on ultrasound

Treatment approach: Multiphase CT/MRI characterisation and biopsy where needed

Uterine Fibroid Embolisation

Typical presentation: heavy bleeding wanting uterus preservation

Treatment approach: IR embolisation as an alternative to surgery

Pathology & Laboratory Medicine

Pre-transfusion Work-up

Typical presentation: planned surgery or anaemia correction

Treatment approach: Grouping, cross-match and component issue with traceability

Infection Diagnostics

Typical presentation: fever work-up; sepsis screening

Treatment approach: Cultures, serology and PCR with antibiotic-sensitivity guidance

Cancer Tissue Diagnosis

Typical presentation: biopsy specimen reporting

Treatment approach: Histopathology with IHC sub-typing feeding the tumour board

Bleeding Disorder Work-up

Typical presentation: easy bruising; prolonged bleeding

Treatment approach: Coagulation panels and factor assays with haematology consult

Health-check Panels

Typical presentation: preventive screening bloods

Treatment approach: Curated packages with physician review of reports

Therapeutic Drug Monitoring

Typical presentation: epilepsy or transplant medication levels

Treatment approach: Scheduled trough-level testing with dosing input

Rheumatology

Rheumatoid Arthritis

Typical presentation: small-joint pain and swelling; morning stiffness beyond 30 minutes

Treatment approach: Early DMARD therapy with treat-to-target monitoring; biologics for resistant disease

Systemic Lupus (SLE)

Typical presentation: facial rash; joint pain; recurrent mouth ulcers in young women

Treatment approach: Immunosuppression tailored to organ involvement with regular monitoring

Ankylosing Spondylitis

Typical presentation: inflammatory low back pain in young men; improves with activity

Treatment approach: Exercise programme, NSAIDs, biologics for persistent activity

Gout

Typical presentation: sudden severe pain and redness of the big toe

Treatment approach: Acute flare control, then urate-lowering therapy with dietary counselling

Sjögren's Syndrome

Typical presentation: dry eyes and dry mouth with joint pains

Treatment approach: Symptomatic sicca care plus systemic therapy where organs involved

Fibromyalgia

Typical presentation: widespread body pain with poor sleep and fatigue

Treatment approach: Education, graded exercise, sleep restoration and centrally acting agents

Hematology

Iron Deficiency Anaemia

Typical presentation: fatigue; pallor; craving for ice or clay

Treatment approach: Oral or IV iron with source-of-loss evaluation

Thalassemia

Typical presentation: childhood anaemia needing transfusions

Treatment approach: Regular transfusion, chelation, and curative transplant for eligible children

Leukaemia

Typical presentation: fever, bleeding gums, bone pain; abnormal counts

Treatment approach: Risk-adapted chemotherapy; transplant for high-risk disease

Lymphoma (haem)

Typical presentation: painless nodes; drenching night sweats

Treatment approach: Staged chemotherapy with PET-guided response assessment

Haemophilia

Typical presentation: bleeding into joints; prolonged bleeding after cuts

Treatment approach: Factor replacement, prophylaxis programmes and joint protection

ITP (low platelets)

Typical presentation: skin bruises; gum bleeding; low platelet count

Treatment approach: Steroids first line; thrombopoietin agents or splenectomy for chronic cases

Physical Medicine & Rehabilitation

Post-stroke Disability

Typical presentation: weakness and dependence after stroke

Treatment approach: Goal-based inpatient/outpatient rehab with speech and occupational therapy

Post-operative Stiffness

Typical presentation: stiff knee/shoulder after surgery

Treatment approach: Protocol-driven graded mobilisation with the operating surgeon

Spinal Cord Injury Rehab

Typical presentation: paralysis after spinal injury

Treatment approach: Bladder-bowel training, mobility aids, vocational rehabilitation

Cerebral Palsy (rehab)

Typical presentation: delayed motor milestones with stiffness

Treatment approach: Multidisciplinary therapy, spasticity management, orthoses

Chronic Neck/Back Pain (rehab)

Typical presentation: posture-related persistent pain

Treatment approach: Exercise therapy, ergonomics, manual therapy programmes

Cardiac Rehab

Typical presentation: recovery after heart attack or bypass

Treatment approach: Monitored graded exercise with risk-factor coaching

Dental & Maxillofacial Surgery

Dental Caries

Typical presentation: tooth sensitivity; pain on sweets; visible cavity

Treatment approach: Fillings or root canal depending on depth; preventive sealants

Gum Disease

Typical presentation: bleeding gums; bad breath; loose teeth

Treatment approach: Scaling, root planing, flap surgery for advanced disease

Impacted Wisdom Tooth

Typical presentation: pain and swelling at the back of the jaw

Treatment approach: Surgical removal under local anaesthesia or sedation

Malocclusion

Typical presentation: irregular or protruding teeth

Treatment approach: Braces or clear aligners after orthodontic work-up

Facial Trauma

Typical presentation: jaw fracture after accident

Treatment approach: Open reduction and internal fixation with occlusion restoration

TMJ Disorders

Typical presentation: jaw clicking; pain on chewing

Treatment approach: Splints, physiotherapy and arthrocentesis for persistent cases

Neurosurgery

Brain Tumour

Typical presentation: progressive headache; early-morning vomiting; new seizures

Treatment approach: Navigation-guided maximal safe resection with onco-team planning

Brain Aneurysm / SAH

Typical presentation: sudden worst-ever headache

Treatment approach: Emergency imaging; clipping or endovascular coiling

Severe Head Injury

Typical presentation: unconsciousness after trauma

Treatment approach: ICP-guided management and decompressive surgery when indicated

Cervical/Lumbar Myelopathy

Typical presentation: clumsy hands; walking imbalance; nerve compression on MRI

Treatment approach: Decompression with or without fusion

Hydrocephalus

Typical presentation: enlarging head in infants; gait/memory issues in elderly

Treatment approach: VP shunt or endoscopic third ventriculostomy

Trigeminal Neuralgia (surgical)

Typical presentation: refractory shock-like face pain

Treatment approach: Microvascular decompression for suitable candidates

9. Frequently Asked Questions

120 frequently asked questions across 10 categories.

Appointments & Booking

Q: How do I book an OPD appointment at KLIMS?

A: You can book through four channels: (1) the KLIMS Care mobile app, (2) the website www.klimshospital.in, (3) the appointment call centre at +91-674-660-1234 between 7 AM and 9 PM, or (4) walk-in registration at any block lobby. Online bookings receive an SMS with a token number, doctor name, room number and reporting time.

Q: Can I choose a specific doctor when booking?

A: Yes. All booking channels let you search by doctor name, department or symptom. Each doctor's visiting days, hours, room number and consultation fee are displayed before you confirm the slot.

Q: What documents should I carry for my first visit?

A: Carry a government photo ID, any previous prescriptions and reports, your insurance card or scheme card (PM-JAY/BSKY/CGHS) if applicable, and the appointment SMS. First-time patients receive a lifetime KLIMS UHID card at registration.

Q: How early should I arrive before my appointment?

A: Arrive 20 minutes early for a repeat visit and 40 minutes early for a first visit to complete registration and vitals. Patients arriving more than 30 minutes late may be moved to the end of the session queue.

Q: How do I reschedule or cancel an appointment?

A: Use the app or website up to 2 hours before the slot, or call +91-674-660-1234. Rescheduling is free once per booking; cancellations made at least 2 hours in advance receive a full refund of any prepaid fee within 5–7 working days.

Q: What happens if my doctor is on leave?

A: You will be notified by SMS and offered the next available slot with the same doctor or an immediate slot with another doctor of the same department at no extra charge.

Q: Is there a walk-in facility without prior booking?

A: Yes. Every department reserves walk-in tokens each OPD session, issued first-come-first-served from the block registration counter. Expect a longer wait than pre-booked patients during peak hours (10 AM–1 PM).

Q: Do you offer tele-consultations?

A: Yes. Video consultations are available with most consultants through the KLIMS Care app. Tele-consultation fees are the same as in-person fees, and e-prescriptions are sent to the app and by SMS.

Q: How does the token and queue system work?

A: Each booking generates a token. Digital displays outside every consultation room show the running token; the app mirrors this in real time so you can wait in the cafeteria and return when your number approaches.

Q: Can I book appointments for family members?

A: Yes. The KLIMS Care app supports up to six family profiles under one mobile number, each with its own UHID and records.

Q: Is there a senior citizen priority in OPD?

A: Patients above 65, pregnant women and persons with disabilities are fast-tracked through dedicated priority counters and are called ahead within each token block.

Q: How far in advance can I book a slot?

A: Slots open 14 days in advance for all consultants. Super-specialty clinics such as the Fertility Clinic and the Pain Clinic open 30 days in advance.

Insurance & TPA

Q: Which insurance companies are accepted at KLIMS?

A: KLIMS is empanelled with 14 major insurers including Star Health, HDFC ERGO, ICICI Lombard, Niva Bupa, Care Health and Bajaj Allianz, working through 12 TPAs. The full list is maintained at the Insurance Help Desk, Block A Ground Floor, and in Section 11 of this document.

Q: How does cashless admission work?

A: Present your insurance card and photo ID at the Insurance Help Desk. The desk sends a pre-authorisation to your TPA; most approvals arrive within 2–6 hours for planned admissions and are expedited for emergencies. You pay only non-covered items at discharge.

Q: What if my cashless request is rejected?

A: You may proceed on a pay-and-claim basis: settle the bill, and the desk will help compile the reimbursement file (discharge summary, itemised bill, investigation reports) within 24 hours of discharge.

Q: Is pre-authorisation needed for emergency admission?

A: No. Emergency treatment is never delayed for insurance. The desk initiates the cashless request within 6 hours of admission on your behalf; keep the insurance card and ID available.

Q: Are OPD consultations covered by insurance?

A: Most retail policies cover only hospitalisation. Policies with OPD riders are accepted at the OPD billing counter — check with the Insurance Help Desk with your policy number.

Q: Does KLIMS accept Ayushman Bharat PM-JAY?

A: Yes. KLIMS is a PM-JAY empanelled hospital. Eligible beneficiaries receive cashless treatment for listed packages; the PM-JAY kiosk at Block A Ground Floor verifies eligibility with your Ayushman card or ration card.

Q: Does KLIMS accept BSKY (Biju Swasthya Kalyan Yojana)?

A: Yes. BSKY card holders from Odisha receive cashless inpatient care per scheme rules. The BSKY help desk sits beside the PM-JAY kiosk at Block A Ground Floor.

Q: What expenses are usually NOT covered by insurance?

A: Typically excluded: registration charges, attendant meals, toiletries, non-medical consumables, and room-rent differences if you choose a room above your policy's eligibility. The pre-authorisation letter lists exclusions before admission.

Q: Can I upgrade my room beyond my insurance eligibility?

A: Yes, by paying the room-rent difference and the proportionate increase in associated charges, explained and signed off before the upgrade.

Q: How long does discharge take for insured patients?

A: After the doctor signs the discharge summary, the final approval from the TPA typically takes 3–6 hours. You may wait in the Discharge Lounge; the ward team will call you when clearance arrives.

Q: Is CGHS / ECHS / ESIC accepted?

A: Yes, KLIMS is empanelled under CGHS, ECHS and ESIC for referred patients at approved rates. Bring the referral memo and beneficiary card to the scheme desk.

Q: Whom do I contact for insurance queries during admission?

A: The Insurance & TPA Help Desk (Block A Ground Floor, 8 AM–8 PM) or dial extension 4500 from any ward phone. After hours, the duty manager at the Emergency reception assists.

Billing & Payments

Q: What payment methods are accepted?

A: All billing counters accept UPI, credit/debit cards, net banking and cash. International patients may pay by card or through the authorised forex counter at Block A Level 1.

Q: Can I get an estimate before a planned surgery?

A: Yes. Ask the treating consultant's coordinator or the billing counter for a written package estimate covering surgeon fees, OT charges, room rent, implants and pharmacy. Estimates are indicative and revised if the clinical

plan changes.

Q: Are there fixed packages for common surgeries?

A: Yes — over 20 procedures have transparent package bands, from cataract surgery to joint replacement and cardiac procedures. See Section 11 for the current package table.

Q: How do I pay an advance for admission?

A: Planned admissions require a deposit of roughly 30–50% of the package estimate at the admission counter; the receipt is adjusted in the final bill. Government scheme and fully cashless patients are exempt as per approval.

Q: Can I get an itemised bill?

A: Yes. Every discharge bill is itemised by default — room, pharmacy (batch-wise), investigations, professional fees and consumables. Duplicate bills are available from central billing for 7 years.

Q: Is there any concession for economically weaker patients?

A: The Charitable Fund Office (Block J Level 2) runs a means-tested concession scheme supported by the KLIMS Foundation. Bring income proof and the treating doctor's recommendation.

Q: Do you offer EMI for large bills?

A: Yes, zero-cost EMI is available for planned procedures through partner financiers at the EMI desk near central billing. Approval usually takes under an hour with PAN and bank details.

Q: Why is my final bill different from the estimate?

A: Estimates assume an uncomplicated course. Extra ICU days, additional implants, blood products or a change in the surgical plan alter the bill; any deviation beyond 10% is explained to the attendant in writing as it occurs.

Q: How do I claim a refund of unused advance?

A: Refunds are initiated automatically at discharge to the original payment mode within 7 working days; cash advances above INR 20,000 are refunded by bank transfer.

Q: Are consultation fees refundable if I don't see the doctor?

A: Yes, fully refundable if the visit doesn't happen and you cancel within the same day; no-shows without cancellation are non-refundable.

Q: Where can I dispute a billing error?

A: Raise it at the billing counter first; unresolved disputes go to the Patient Relations Office (Block A Level 1) with a guaranteed written response within 48 hours.

Q: Do investigations cost extra during a package?

A: Package-listed investigations are included. Tests outside the package (e.g., unrelated screening) are billed separately and flagged to you before they are done.

Visiting Hours & Attendants

Q: What are the general ward visiting hours?

A: General wards: 11 AM–1 PM and 5 PM–7 PM daily. Two visitors per patient at a time; children below 12 are discouraged on inpatient floors for infection safety.

Q: What are the ICU visiting rules?

A: ICUs allow one visitor at a time during 12 PM–12:30 PM and 6 PM–6:30 PM. The duty doctor briefs one designated family member daily at the ICU counselling room; video-call kiosks connect families at other hours.

Q: How many attendants can stay with a patient?

A: One attendant pass per patient in general and semi-private wards; private rooms have an attendant couch for one adult. ICU patients' attendants wait in the ICU family lounge.

Q: Is there overnight accommodation for family?

A: Yes — the KLIMS Guest House (48 rooms) and a 120-bed dormitory in Block J. Book at the ground floor kiosk or through the ward guest-relations executive.

Q: Can visitors bring food for patients?

A: Only with the treating team's approval. Inpatient meals are diet-kitchen controlled; outside food risks interfering with therapeutic diets, particularly for surgical, diabetic and renal patients.

Q: Are mobile phones allowed in wards?

A: Yes, on silent mode. Photography and video are prohibited on all clinical floors to protect patient privacy.

Q: What identification do attendants need?

A: The photo attendant pass issued at admission plus a government ID. Passes are checked at floor access gates after 8 PM.

Q: Can children visit newborn babies?

A: Siblings may view the newborn through the nursery glass. Entry into the NICU is restricted to parents after hand hygiene and gowning.

Q: What are visiting rules during infection outbreaks?

A: During declared outbreaks the hospital may suspend visiting and shift all family communication to the video-call kiosks and daily telephonic briefings, announced on the website and at entrances.

Q: Is there a place for attendants to bathe and rest?

A: Yes — shower blocks near the Block J dormitory, recliner lounges outside ICUs and the 24x7 coffee lounge in Block G.

Q: Can I stay with my child in the paediatric ward?

A: One parent is encouraged to stay round the clock in the paediatric ward; a fold-out bed is provided beside each cot in Block C.

Q: How do I get a gate pass for discharged patient pickup at night?

A: The night duty manager at the Emergency reception (Block G) issues vehicle gate passes for discharges after 9 PM.

Emergency Services

Q: What number do I call for an ambulance?

A: Dial 1066 (toll-free) or 1066 (toll-free) / +91-674-660-1066. The dispatcher stays on the line, guides first aid, and dispatches the nearest ambulance; ALS units carry a paramedic, ventilator and defibrillator.

Q: Where is the Emergency Department located?

A: Block G, ground floor, with a dedicated entrance from Gate 2. The ED is signposted in red from every campus gate and has its own drop-off porch and CT scanner.

Q: How does triage work — will I be seen immediately?

A: Every arrival is triaged within 5 minutes into five levels. Level 1–2 (life-threatening) go straight to resuscitation bays; Level 3 is seen within 30 minutes; Levels 4–5 (minor) may wait longer while sicker patients are prioritised.

Q: Do I need to pay before emergency treatment begins?

A: No. Stabilising treatment always begins immediately. Billing and insurance formalities are completed in parallel by the family with the ED billing counter.

Q: Is the Emergency Department open on holidays?

A: Yes — 24 hours a day, 365 days a year, including all festivals, with full lab, imaging, blood bank and operating theatre backup.

Q: What should I do in case of a suspected heart attack?

A: Call 1066 immediately; chew one aspirin 325 mg if not allergic, and do not drive yourself. The ED runs a door-to-ECG target of 10 minutes and activates the cathlab for primary angioplasty 24x7.

Q: What should I do in case of a suspected stroke?

A: Note the time symptoms started and call 1066 — mention 'stroke'. The stroke code team meets the ambulance at the door; clot-busting treatment works best within 4.5 hours of onset.

Q: Is there a separate paediatric emergency?

A: Yes, a child-friendly paediatric bay within the ED staffed by paediatric-trained nurses, with the PICU one floor above.

Q: What about snake bites and poisoning?

A: The ED stocks anti-snake venom and common antidotes round the clock and consults the regional poison information centre for complex ingestions.

Q: Can the ambulance reach rural areas outside Bhubaneswar?

A: The fleet covers a 60 km radius. For longer distances the control room coordinates with partner ambulance networks and arranges inter-hospital transfers, including air ambulance liaison via the Block G helipad.

Q: Where do I wait while my patient is in the ED?

A: The ED family lounge, opposite the triage desk, with a live status board. One relative is called in once the patient is stabilised.

Q: What if I arrive with a medico-legal case?

A: Medico-legal cases (accidents, assaults, poisoning) are treated immediately; the ED completes police intimation as required by law. Treatment is never delayed for paperwork.

Medical Records & Reports

Q: How do I get my lab reports?

A: Reports are published to the KLIMS Care app and patient portal as soon as they are verified — most routine bloods within the same day. Printed copies are available at the Block F report counter with your UHID.

Q: How do I get a copy of my discharge summary?

A: One copy is issued free at discharge. Duplicates can be requested at the Medical Records Department (MRD), Block A Level 2, or through the app; digital copies are emailed within 3 working days.

Q: How long does KLIMS keep my medical records?

A: Inpatient records are retained for at least 10 years (indefinitely for medico-legal cases) in the electronic medical record. Your UHID links every visit since first registration.

Q: Can another hospital request my records?

A: Yes, with your written consent. MRD shares records directly with the requesting hospital or hands a sealed copy to you; urgent transfers are processed the same day.

Q: How do I get films/CDs of my MRI or CT?

A: Images are shared as a secure web link by default. CDs or films can be requested at the Radiology reception, Block F, within 90 days of the scan at a nominal media charge.

Q: Can I correct a mistake in my records?

A: Yes. Submit a correction request at MRD with proof (e.g., ID for name/date errors). Clinical content corrections require the treating consultant's endorsement.

Q: Are my records confidential?

A: Yes. Access is role-restricted and audited. Records are released only to you, your authorised representative, or as required by law. KLIMS complies with applicable Indian data protection rules.

Q: How do I access records of a deceased relative?

A: The legal heir may apply at MRD with the death certificate, proof of relationship and an indemnity form; records are released within 7 working days.

Q: Can I get my complete file for a second opinion abroad?

A: Yes — request an international medical summary from MRD; it compiles diagnoses, operative notes, imaging links and medication lists in a format accepted by overseas hospitals.

Q: Where do I collect histopathology (biopsy) reports?

A: Biopsy reports are released to the app and the Block F counter in 4–6 working days; complex immunohistochemistry cases may take up to 10 days, with an interim note issued.

Q: Do you provide medical certificates?

A: Fitness, illness and leave certificates are issued by the treating consultant during OPD hours; medico-legal certificates follow the MRD process with prescribed forms.

Q: Is there a charge for duplicate reports?

A: App and portal downloads are free forever. Printed duplicates cost INR 20 per report page and INR 300 per imaging CD.

Pharmacy

Q: Where is the main pharmacy and when is it open?

A: The main pharmacy is in Block J, ground floor, open 24x7. Satellite pharmacies operate in Blocks A, C, E and I during OPD hours (8 AM–8 PM).

Q: Do I get a discount on medicines?

A: Inpatients receive 10% off MRP on pharmacy items billed to the ward. KLIMS also stocks generic equivalents — ask the pharmacist for the lower-cost substitution list approved by your doctor.

Q: Can the pharmacy home-deliver medicines?

A: Yes, within 15 km of the campus for orders above INR 500 placed on the KLIMS Care app before 6 PM; same-day delivery with a valid prescription.

Q: Are cold-chain medicines like insulin available?

A: Yes. The pharmacy maintains a validated cold chain for insulin, vaccines and biologics, with temperature-logged storage and insulated carry packs at purchase.

Q: Can I return unused medicines?

A: Unopened strips and bottles purchased at KLIMS may be returned within 7 days with the bill, except cold-chain, narcotic and cut-strip items.

Q: Does the pharmacy stock narcotic painkillers?

A: Yes, under the NDPS licence. These require the original prescription from a KLIMS consultant and the patient's ID; quantities follow statutory limits.

Q: What if a prescribed medicine is out of stock?

A: The pharmacist sources it within 24 hours through the distributor network or dispenses a doctor-approved equivalent immediately, at your choice.

Q: Can outsiders buy from the KLIMS pharmacy?

A: Yes, the pharmacy serves the public with any valid prescription; KLIMS registration is not required.

Q: Is there a separate cancer-medicine pharmacy?

A: Yes — the oncology pharmacy inside Block E handles chemotherapy drugs with cold chain and safe-handling compounding; it coordinates directly with the day-care unit.

Q: Do you sell surgical supplies and equipment?

A: The Surgical & Ostomy Store (Block B ground floor) stocks dressings, ostomy bags, braces, and rents wheelchairs, oxygen concentrators and hospital cots.

Q: Are ayurvedic or homeopathic medicines available?

A: A physician-approved wellness corner in Block J stocks selected supplements; classical ayurvedic/homeopathic dispensing is not offered within the hospital.

Q: How are e-prescriptions from tele-consultations handled?

A: E-prescriptions carry a QR code; show it at any KLIMS pharmacy counter or order home delivery in the app — no paper copy needed.

Admission & Discharge

Q: How does planned admission work?

A: Your consultant issues an admission advice with a tentative date. The Admission Cell (Block A, ground floor) calls a day prior to confirm the bed, deposit and reporting time — usually 7 AM for surgeries.

Q: What should I pack for admission?

A: ID, insurance/scheme card, admission advice, current medicines in original packs, previous reports, loose comfortable clothing and personal toiletries. Valuables are best left at home; lockers are available for small items.

Q: Can I choose my room category?

A: Yes — general ward, twin-sharing, private deluxe or suite, subject to availability and (for insured patients) your policy's room-rent eligibility. Tariff cards are displayed at the admission counter.

Q: What is the standard discharge process?

A: The consultant writes the discharge order on the morning round; nursing completes final vitals and medicine handover; pharmacy returns unused stock; billing prepares the final bill; and you receive a discharge summary with follow-up dates. Typical time: 3–5 hours, spent comfortably in the Discharge Lounge.

Q: What is DAMA / LAMA discharge?

A: Discharge Against Medical Advice: an adult patient may leave despite medical advice after signing an informed declaration. Risks are explained, medicines and summary are still provided, and you may return any time.

Q: Who explains my medicines at discharge?

A: A clinical pharmacist walks you through every discharge medicine — dose, timing, food instructions and side effects — and marks a colour-coded schedule card in your preferred language.

Q: When are follow-up visits and are they charged?

A: The first post-discharge review (usually 7–10 days) is free for the operating/treating consultant within 14 days of discharge. Follow-up dates and booking links are printed on the discharge summary.

Q: What are my rights as a patient at KLIMS?

A: The Patient Rights Charter — displayed in every lobby — covers the right to information, informed consent, confidentiality, second opinion, itemised billing, records access, non-discrimination and grievance redressal. See Section 14 of this document.

Q: What are my responsibilities as a patient?

A: Share complete health information, follow the agreed treatment plan, respect queue and visiting rules, settle bills on time, and treat staff and fellow patients with courtesy.

Q: How is an emergency admission converted to a regular bed?

A: Once stabilised in the ED observation unit, the bed manager allots a ward or ICU bed per clinical need — usually within 4 hours — and your ED record moves with you electronically.

Q: Can I request a specific consultant during admission?

A: Yes, you may name a preferred consultant of the concerned department at admission; if unavailable, the on-call consultant of the same unit takes over with your consent.

Q: What happens to my belongings during surgery?

A: The ward locks personal items in a numbered cupboard; spectacles, dentures and prosthetics are logged and handed to your attendant before you move to the OT.

Second Opinion & Teleconsultation

Q: Can I get a second opinion at KLIMS?

A: Yes, and it is a stated patient right. Book a 'Second Opinion' slot with any consultant in the app or at the counter; bring existing reports and imaging. Your original doctor's plan is reviewed respectfully and independently.

Q: Will my treating doctor be offended if I seek a second opinion?

A: No. KLIMS policy treats second opinions as good practice; tumour-board and multi-consultant reviews are built into cancer, cardiac and complex surgical pathways by default.

Q: How do I send reports for an opinion without travelling?

A: Use 'e-Opinion' on the website: upload reports and imaging links, choose the specialty, and receive a written opinion within 3 working days, followed by an optional video discussion.

Q: What do tele-consultations cost?

A: The same as the doctor's in-person fee. Reviews of uploaded reports without a live call (e-Opinion) are charged at 60% of the consultation fee.

Q: Which app do I need for video consultation?

A: The KLIMS Care app (Android and iOS). Bookings, payments, prescriptions, reports and the video call all happen inside the app; a Chrome browser link is available for those without smartphones.

Q: Can tele-consultation replace a physical first visit?

A: For many stable conditions yes, but examinations, procedures and emergencies need in-person visits. The tele-doctor will convert your booking to a priority physical slot when examination is essential, adjusting the fee already paid.

Q: Can an outstation lab report be used at KLIMS?

A: Yes, consultants accept NABL-accredited outside reports at their discretion; tests may be repeated only when quality or timing genuinely affects the decision, and the reason is explained.

Q: Do you provide international video consultations?

A: Yes, the International Patient Desk schedules video consultations across time zones and provides an English medical summary; payments are accepted by international card.

Q: How do I share my KLIMS records with an outside doctor?

A: Every report in the app has a share button generating a time-limited secure link; or MRD can courier attested copies to a named hospital with your consent.

Q: Is a second opinion available for surgery advised elsewhere?

A: Yes — the 'Surgery Second Opinion' clinic reviews outside advice for major operations (cardiac, spine, joint replacement, cancer) with same-week slots in each surgical department.

Q: Are follow-up tele-consults cheaper?

A: Within 14 days of a paid consultation, a brief tele-follow-up with the same consultant for the same complaint is free; thereafter standard fees apply.

Q: Can I get a written opinion for insurance purposes?

A: Yes, consultants issue signed opinion letters (e.g., for claim justification or treatment necessity) at a documentation fee of INR 500.

General & International

Q: Where exactly is KLIMS located?

A: KLIMS Health City, Plot 47, Chandaka Institutional Area, Patia, Bhubaneswar, Odisha 751024, India. The campus is 9 km from Bhubaneswar Railway Station and 12 km from Biju Patnaik International Airport, with an hourly shuttle to the station.

Q: What are the OPD timings in general?

A: Most OPDs run Monday to Saturday in two sessions: 8:30 AM–1:30 PM and 4:30 PM–8 PM. Sunday OPD runs a reduced schedule; the Emergency Department, pharmacy, lab and imaging never close.

Q: Is there parking, and what does it cost?

A: A 1,200-car multi-level park sits behind Block J (first 30 minutes free, INR 30/hour after) plus two-wheeler parking beside Block G at INR 10 flat for OPD visitors. Valet is available at Block A.

Q: Does the campus have Wi-Fi?

A: Yes — free 'KLIMS-Guest' Wi-Fi across all blocks, 2 GB per device per day, activated with a mobile OTP.

Q: What languages do the staff speak?

A: Odia, Hindi and English are spoken widely; interpreter support for Bengali, Telugu and other languages can be booked through any May I Help You desk.

Q: Is KLIMS accredited?

A: KLIMS holds NABH accreditation for hospital standards, NABL accreditation for the laboratory, and its blood centre and imaging services carry the corresponding statutory licences.

Q: How do international patients get started?

A: Email care@klimshospital.in or use the International Patients page; the desk issues a visa-support letter, cost estimate and airport pick-up plan, and assigns a personal care coordinator on arrival.

Q: Is there an ATM and bank inside?

A: Four ATMs across campus and a full-service bank branch in Block J (weekdays 10 AM–4 PM), plus a forex counter for international patients in Block A.

Q: Can I get a health check package?

A: Yes — Executive Health Check packages from basic (INR 2,999) to platinum cardiac-plus-cancer screening (INR 24,999), completed in 4–6 hours in the dedicated lounge in Block F with same-day physician review.

Q: What is the UHID everyone keeps asking for?

A: Your Unique Hospital ID — a lifetime number issued at first registration that links every visit, report and bill. It's printed on your KLIMS card and visible in the app.

Q: How do I give feedback or file a complaint?

A: Use feedback QR codes at every counter, the app's feedback tab, or the Patient Relations Office in Block A Level 1. Every written complaint receives a documented response within 48 hours.

Q: Does KLIMS have a blood bank?

A: Yes, a licensed component blood centre in Block F (third floor) operating 24x7, with a comfortable voluntary donor lounge. Family replacement and voluntary donations are both welcome.

10. Insurance & Billing

Empanelled Insurance Companies

#	Insurer
1	Star Health & Allied Insurance
2	HDFC ERGO Health
3	ICICI Lombard General Insurance
4	Niva Bupa Health Insurance
5	Care Health Insurance
6	Aditya Birla Health Insurance
7	Tata AIG General Insurance
8	Bajaj Allianz General Insurance
9	SBI General Insurance
10	New India Assurance
11	United India Insurance
12	Oriental Insurance
13	National Insurance Company
14	ManipalCigna Health Insurance

Empanelled Third-Party Administrators (TPAs)

#	TPA
1	MediAssist India TPA
2	Paramount Health Services TPA
3	MDIndia Health Insurance TPA
4	Vidal Health TPA
5	Health India Insurance TPA
6	Raksha Health Insurance TPA
7	FHPL (Family Health Plan) TPA
8	Good Health Insurance TPA
9	Safeway Insurance TPA

12	Heritage Health TPA

Government & Statutory Schemes

Ayushman Bharat PM-JAY

Cashless treatment up to INR 5,00,000 per family per year for eligible families; PM-JAY kiosk at Block A Ground Floor.

Biju Swasthya Kalyan Yojana (BSKY)

Odisha state scheme; cashless care for eligible card holders; dedicated BSKY help desk at Block A Ground Floor.

CGHS

Central Government Health Scheme empanelment for OPD and IPD at approved rates; referral memo required.

ECHS

Ex-Servicemen Contributory Health Scheme; empanelled for cashless inpatient care with referral from ECHS polyclinic.

ESIC

Referral-based cashless care for insured workers under the ESIC tie-up.

Indicative Package Costs

Package estimates cover surgeon fees, OT charges, standard room rent for the listed length of stay, routine implants and pharmacy; complications, extra ICU days or non-standard implants are billed separately.

Procedure	From (INR)	To (INR)
Coronary Angiography (day-care)	22,000	32,000
Coronary Angioplasty (single stent)	165,000	260,000
CABG (Bypass Surgery)	285,000	420,000
Total Knee Replacement (single knee)	195,000	310,000
Total Hip Replacement	210,000	330,000
Laparoscopic Cholecystectomy	62,000	95,000
Laparoscopic Hernia Repair	55,000	88,000
Normal Vaginal Delivery	38,000	65,000
Caesarean Section	62,000	105,000
Cataract Surgery (Phaco, per eye)	24,000	68,000
TURP (Prostate Surgery)	72,000	110,000
PCNL (Kidney Stone Surgery)	78,000	120,000
Hysterectomy (Laparoscopic)	85,000	130,000
Craniotomy for Tumour	260,000	420,000
Spinal Fusion Surgery	220,000	360,000
Chemotherapy Cycle (day-care)	18,000	85,000
Radiotherapy Course (IMRT)	180,000	280,000
Bone Marrow Transplant (autologous)	900,000	1,400,000
Tonsillectomy	38,000	60,000
FESS (Sinus Surgery)	65,000	98,000

11. Facilities & Amenities

110 patient and visitor amenities across the campus, grouped by category.

Food & Beverage

Facility	Details
Annapurna Main Cafeteria	Block J Ground Floor; 6:30 AM–10:30 PM; vegetarian and non-vegetarian meals, diabetic-friendly counter
24x7 Coffee Lounge	Block G Ground Floor near Emergency; hot beverages, sandwiches and snacks round the clock
Patient Diet Kitchen	Therapeutic diets prescribed by dietitians delivered to inpatient beds thrice daily
Juice & Salad Bar	Block A Ground Floor atrium; fresh juices, fruit bowls and salads, 8 AM–8 PM
South Indian Counter	Block J Ground Floor; dosa, idli and filter coffee, 7 AM–9 PM
North Indian Thali Counter	Block J Ground Floor; fixed thali meals at subsidised rates for attendants
Bakery & Confectionery	Block J First Floor; fresh bakes, sugar-free options available
Vending Machines	Every block lobby; water, beverages and packaged snacks, 24x7
Attendant Meal Coupons	Subsidised meal coupons for one attendant per admitted patient from the ward desk
Baby Feeding Rooms	Private nursing rooms in Blocks A, C and H with sterilising facilities
RO Drinking Water Stations	Purified water dispensers on every floor of every block
Night Canteen for Staff & Attendants	Block J Ground Floor; 11 PM–6 AM limited hot menu

Transport & Parking

Facility	Details
Multi-level Car Park	1,200 car capacity behind Block J; first 30 minutes free; INR 30 per subsequent hour
Two-wheeler Parking	600 capacity beside Block G; INR 10 flat for OPD visitors
Valet Parking	Block A main porch; INR 100 per visit, 8 AM–8 PM
Free Campus Shuttle	Electric buggy loop connecting all ten blocks every 10 minutes, 7 AM–9 PM
Ambulance Fleet	14 ambulances including 5 Advanced Life Support units; dial 1066
App-cab Pick-up Zone	Designated ride-hailing bay at Gate 2 with waiting shelter
Railway Station Shuttle	Hourly coach to Bhubaneswar Railway Station, 6 AM–10 PM; tickets at Block J kiosk
Airport Assistance Desk	Pre-booked pick-up/drop for international and outstation patients
Auto-rickshaw Stand	Regulated pre-paid stand outside Gate 3
Patient Drop-off Bays	Covered drop-off porches at Blocks A, C, E and G
Cycle Stand	Free bicycle parking near Gate 4 for staff and visitors
Driver Rest Area	Waiting hall with seating and canteen access behind the car park

Accessibility

Facility	Details
Wheelchair Service	Free wheelchairs with attendants at every block entrance; no deposit needed
Stretcher & Trolley Service	Available at Emergency and all block lobbies via the porter desk
Ramps & Step-free Routes	All public routes are step-free; tactile guide paths from every gate
Accessible Washrooms	Wheelchair-accessible washrooms on every floor

Facility	Details
Braille & Tactile Signage	Elevator panels and key signage in Braille throughout the campus
Hearing Loop Systems	Induction loops at registration counters in Blocks A and H
Sign Language Support	On-call sign language interpreter via the May I Help You desk
Priority Counters	Dedicated queues for senior citizens, pregnant women and persons with disabilities
Low-vision Assistance	Escort volunteers bookable at any information desk
Accessible Parking Bays	Reserved bays adjacent to every block entrance with extra transfer width

Comfort & Stay

Facility	Details
KLIMS Guest House	48 air-conditioned rooms in Block J for outstation attendants; INR 900–1,800 per night
Dormitory for Attendants	120 beds at INR 150 per night with lockers and hot showers
Day-care Lounges	Recliner lounges for day procedure patients in Blocks E, F and I
Private Deluxe Rooms	210 single rooms with attendant couch, TV and en-suite bathroom
Suite Rooms	24 suites with separate living area, pantry and visitor seating
General Wards	Economy multi-bed wards with curtained bays and central nursing stations
Air-conditioned Waiting Halls	Every OPD floor; live token displays and device charging points
Children's Play Areas	Supervised play corners in Block C and the Block A atrium
Rooftop Healing Garden	Landscaped garden atop Block D open to patients 6 AM–6 PM
Library & Reading Corner	Block J First Floor; books, magazines and newspapers in four languages
Television Lounges	Common TV areas in all inpatient floors and major waiting halls
Blanket & Pillow Service	Extra linen for attendants from ward housekeeping on request

Communication

Facility	Details
Free Campus Wi-Fi	'KLIMS-Guest' network; 2 GB per device per day; log in with mobile OTP
Mobile Charging Stations	Lockable charging lockers in all waiting areas
Public Telephone Booths	Coin/card booths at Blocks A, G and J for those without mobiles
Video-call Kiosks	Free kiosks to connect ICU families with patients at fixed hours
Translator Service	Interpreters for Odia, Hindi, Bengali, Telugu and English; on-call for other languages
International Patient Desk	Visa letters, FRRO help, currency guidance and language support; Block A Level 1
Postal & Courier Counter	Block J Ground Floor; document dispatch and parcel receipt, 9 AM–6 PM
Public Address & Token System	Digital token displays with multilingual voice announcements

Financial

Facility	Details
ATM Cluster	Four bank ATMs: Block A porch, Block G entrance, Block J lobby and staff quarters gate
Bank Branch	Full-service nationalised bank branch, Block J First Floor, 10 AM–4 PM weekdays
Currency Exchange	Authorised forex counter for international patients, Block A Level 1
Insurance & TPA Help Desk	Cashless pre-authorisation support, Block A Ground Floor, 8 AM–8 PM
PM-JAY / BSKY Kiosk	Government scheme eligibility check and card services, Block A Ground Floor

Facility	Details
Billing Counters	Central billing in every block; UPI, cards, net-banking and cash accepted
EMI & Medical Loan Desk	Zero-cost EMI facilitation for planned procedures with partner financiers
Charitable Fund Office	Means-tested concession scheme for economically weaker patients, Block J Level 2

Spiritual

Facility	Details
Multi-faith Prayer Hall	Quiet multi-faith hall, Block J Second Floor, open 24x7
Temple	Small shrine near Gate 4 garden, open dawn to dusk
Meditation & Yoga Room	Guided sessions 6:30 AM and 5 PM daily, Block D rooftop annex
Grief Counselling	Trained counsellors for bereaved families via Medical Social Work office
Chaplaincy Visits	Faith visitors of any denomination arranged on family request
Quiet Rooms	Silent rest rooms adjacent to ICUs for anxious families
Festival Celebrations	Ward-friendly festival observances organised by patient welfare team
Last Rites Assistance	Mortuary van and documentation help coordinated round the clock

Retail

Facility	Details
24x7 Main Pharmacy	Block J Ground Floor; every prescribed medicine with 10% inpatient discount
OPD Satellite Pharmacies	Quick-dispense counters in Blocks A, C, E and I during OPD hours
Surgical & Ostomy Store	Appliances, dressings and post-surgical garments, Block B Ground Floor
Optical Shop	Spectacles and contact lenses beside Ophthalmology OPD, Block H
Hearing Aid Centre	Fitting and servicing beside ENT OPD, Block H Third Floor
Medical Equipment Rental	Wheelchairs, oxygen concentrators and hospital cots for home use
Convenience Store	Toiletries, snacks and daily essentials, Block J lobby, 7 AM–11 PM
Flower & Gift Shop	Fresh flowers and get-well gifts, Block A atrium
Mother & Baby Store	Newborn essentials next to the Mother & Child Block lobby
Ayurveda & Wellness Corner	Physician-approved supplements and wellness products, Block J

Patient Support

Facility	Details
May I Help You Desks	Uniformed guest-relations staff at every block lobby
Patient Relations Office	Complaints, feedback and grievance redressal, Block A Level 1; response within 48 hours
Medical Social Work Department	Financial counselling, scheme navigation and NGO linkage
Dietitian Consultations	Personalised diet plans for inpatients and OPD referral patients
Home Care Services	Nursing visits, physiotherapy and sample collection at home
Tele-consultation Service	Video follow-ups with treating doctors via the KLIMS Care app
Health Check Lounge	Executive health packages with same-day physician review, Block F Level 4
Vaccination Centre	Adult and travel vaccinations, Block A Level 2, 9 AM–5 PM
Organ Donation Cell	Counselling and pledge registration, Block A Level 1

Facility	Details
Blood Donation Lounge	Comfortable donor suite with refreshments, Block F Third Floor
Patient Education Studio	Condition-specific classes: diabetes, dialysis, antenatal and cardiac rehab
Discharge Lounge	Comfortable waiting space while discharge papers and pharmacy are completed

Hygiene & Laundry

Facility	Details
Attendant Shower Blocks	Hot-water shower and changing rooms near dormitory, Block J
Laundry Service	Same-day personal laundry for inpatients and guest house residents
Housekeeping on Call	Dial 55 from any ward phone for cleaning requests
Hand Hygiene Stations	Sanitiser dispensers at every entrance, lift lobby and bed
Sterile Linen Supply	Hospital-laundried linen changed daily and on demand
Public Washrooms	Cleaned hourly; attendant-monitored in high-traffic areas
Baby Changing Stations	In washrooms of Blocks A, C and H
Barber & Salon Service	On-call grooming service for long-stay inpatients

Safety & Security

Facility	Details
24x7 Security Control Room	180 CCTV-monitored zones; dial 100 from any internal phone
Fire Safety Systems	Sprinklers, hydrants and evacuation drills every quarter
Baggage Cloak Room	Secure luggage storage for outstation attendants, Block J, INR 50/day
Lost & Found Office	Block G security office; items logged and held for 90 days
Women's Safety Escort	Security escort to parking after 9 PM on request
Child Protection Protocol	Tagged newborn security and child-lost alarm system
Emergency Assembly Points	Marked muster zones outside Blocks A, E and J
First-Aid Stations	Public first-aid points at the atrium, car park and cafeteria
Visitor Pass System	Photo-pass entry for inpatient floors; two attendants per patient
Night Marshal Patrols	Uniformed patrols across all open areas from 10 PM to 6 AM

12. Emergency & Ambulance Protocols

The Emergency Department is located in Block G, ground floor, and operates 24 hours a day, 365 days a year. Dial **1066** (toll-free) or 1066 (toll-free) / +91-674-660-1066 for ambulance dispatch; the control-room dispatcher stays on the line to guide first aid while the nearest ambulance (14-strong fleet, including 5 Advanced Life Support units) is sent.

Every arrival is triaged within 5 minutes into five acuity levels. Level 1–2 (life-threatening) patients go straight to one of six resuscitation bays; Level 3 is seen within 30 minutes; Levels 4–5 (minor) wait longer while sicker patients are prioritised. Stabilising treatment always begins immediately — billing and insurance formalities run in parallel and never delay emergency care.

Time-critical activation pathways:

Suspected heart attack: door-to-ECG target of 10 minutes; cathlab activated 24x7 for primary angioplasty.

Suspected stroke: stroke code team meets the ambulance at the door; note the symptom-onset time, as thrombolysis works best within 4.5 hours.

Polytrauma: ATLS-driven stabilisation, imaging and damage-control surgery activation.

Snake bite / poisoning: anti-snake venom and common antidotes stocked round the clock with ICU backup.

Air ambulance: the Block G rooftop helipad supports inter-facility transfers for critical patients.

13. Admissions, Discharge & Patient Rights

Planned Admission

Your consultant issues an admission advice with a tentative date; the Admission Cell (Block A, ground floor) calls a day prior to confirm the bed, deposit and reporting time — usually 7 AM for surgeries. Room categories range from general ward through twin-sharing and private deluxe to suite rooms, subject to availability and (for insured patients) policy eligibility.

Discharge Process

The consultant writes the discharge order on the morning round; nursing completes final vitals and medicine handover; pharmacy returns unused stock; billing prepares the final bill; and the patient receives a discharge summary with follow-up dates. Typical time from discharge order to leaving is 3–5 hours, spent in the Discharge Lounge. A clinical pharmacist explains every discharge medicine — dose, timing, food instructions and side effects — with a colour-coded schedule card.

Patient Rights Charter

- Right to information about diagnosis, treatment options and cost before consenting to care.
- Right to informed consent for any procedure, with risks explained in a language the patient understands.
- Right to confidentiality of medical records, released only to the patient, an authorised representative, or as required by law.
- Right to seek a second opinion at any stage without prejudice to ongoing care.
- Right to an itemised bill and to dispute charges through the Patient Relations Office.
- Right to access one's own medical records and receive copies of reports and discharge summaries.
- Right to non-discriminatory care regardless of background, and to courteous treatment from staff.
- Right to a documented grievance-redressal response within 48 hours of a written complaint.

Patient Responsibilities

- Share complete and accurate health information with the treating team.
- Follow the agreed treatment plan and attend scheduled follow-ups.
- Respect queue, token and visiting-hour rules for the benefit of other patients.
- Settle bills in a timely manner or engage the Medical Social Work / EMI desks proactively if unable to.
- Treat staff, other patients and visitors with courtesy.

14. Contact Directory
